 Chan 32, Sathorn, Bangkok

SINCE 1985

ABOUT COMPANY

Leader in Professional Industrial Tools

Nandee Inter-Trade Co., Ltd. was established on July 1, 1983. Over the past 43 years, Nandee has committed to the "One Product One Brand" policy, which means being the sole import representative for only one brand per product. This demonstrates manufacturers' sincerity and commitment to product development in the market, which also strengthens the brand of that product. The company only selects high-quality products that will help customers work smoothly and achieve valuable productivity.

The company adheres to operational principles that focus on customer honesty, integrity toward business partners, and employee fairness. The company believes that this approach will enable Nandee to move forward with success.

บริษัท นานดีอินเตอร์เทรด จำกัด ก่อตั้งขึ้นเมื่อวันที่ 1 กรกฎาคม พ.ศ. 2526 ตลอดระยะเวลา 43 ปีที่ผ่านมา บริษัท นานดีอินเตอร์เทรด จำกัด ยึดถือนโยบาย "One Product One Brand" คือการเป็นตัวแทนนำเข้าสินค้าเพียงยี่ห้อเดียวต่อหนึ่งผลิตภัณฑ์ เพื่อแสดงถึงความจริงใจและความมุ่งมั่นในการพัฒนาสินค้าในตลาดต่อผู้ผลิต อีกทั้งยังเป็นการสร้างความแข็งแกร่งให้กับยี่ห้อสินค้านั้น โดยเลือกสินค้าที่มีคุณภาพสูงที่จะช่วยให้การทำงานของลูกค้าเป็นไปอย่างราบรื่น และได้ผลผลิตที่คุ้มค่า

โดยบริษัทฯ ยึดหลักแนวทางการปฏิบัติงานที่มุ่งเน้นเรื่องความซื่อสัตย์ต่อลูกค้า ชื่อตรงต่อคู่ค้า และเที่ยงธรรมต่อพนักงาน ซึ่งทางบริษัทฯ เชื่อมั่นว่าแนวทางการปฏิบัตินี้จะส่งผลให้บริษัทฯ สามารถก้าวเดินไปข้างหน้าอย่างมั่นคง

OVER 40 YEARS OF EXPERIENCE

2025

Construction of the new
Distribution Center & Assembly Plant

ก่อสร้างศูนย์กระจายสินค้า และโรงประกอบ

2016

Established Nandee sales office branch in Rayong

ก่อตั้งออฟฟิศนานาชาติสาขาระยอง

1993

Moved Head Quarter Office to Sathorn area

ย้ายสำนักงานมาที่เซนต์หลุยส์ เซนเตอร์ เขตสาทร

1987

Joint venture with Strapack Japan to establish a
Strapack (Thailand)

Strapack

ร่วมทุนกับบริษัท Strapack ประเทศญี่ปุ่น เปิดโรงงานผลิต
เครื่องรัด Strapack (Thailand)

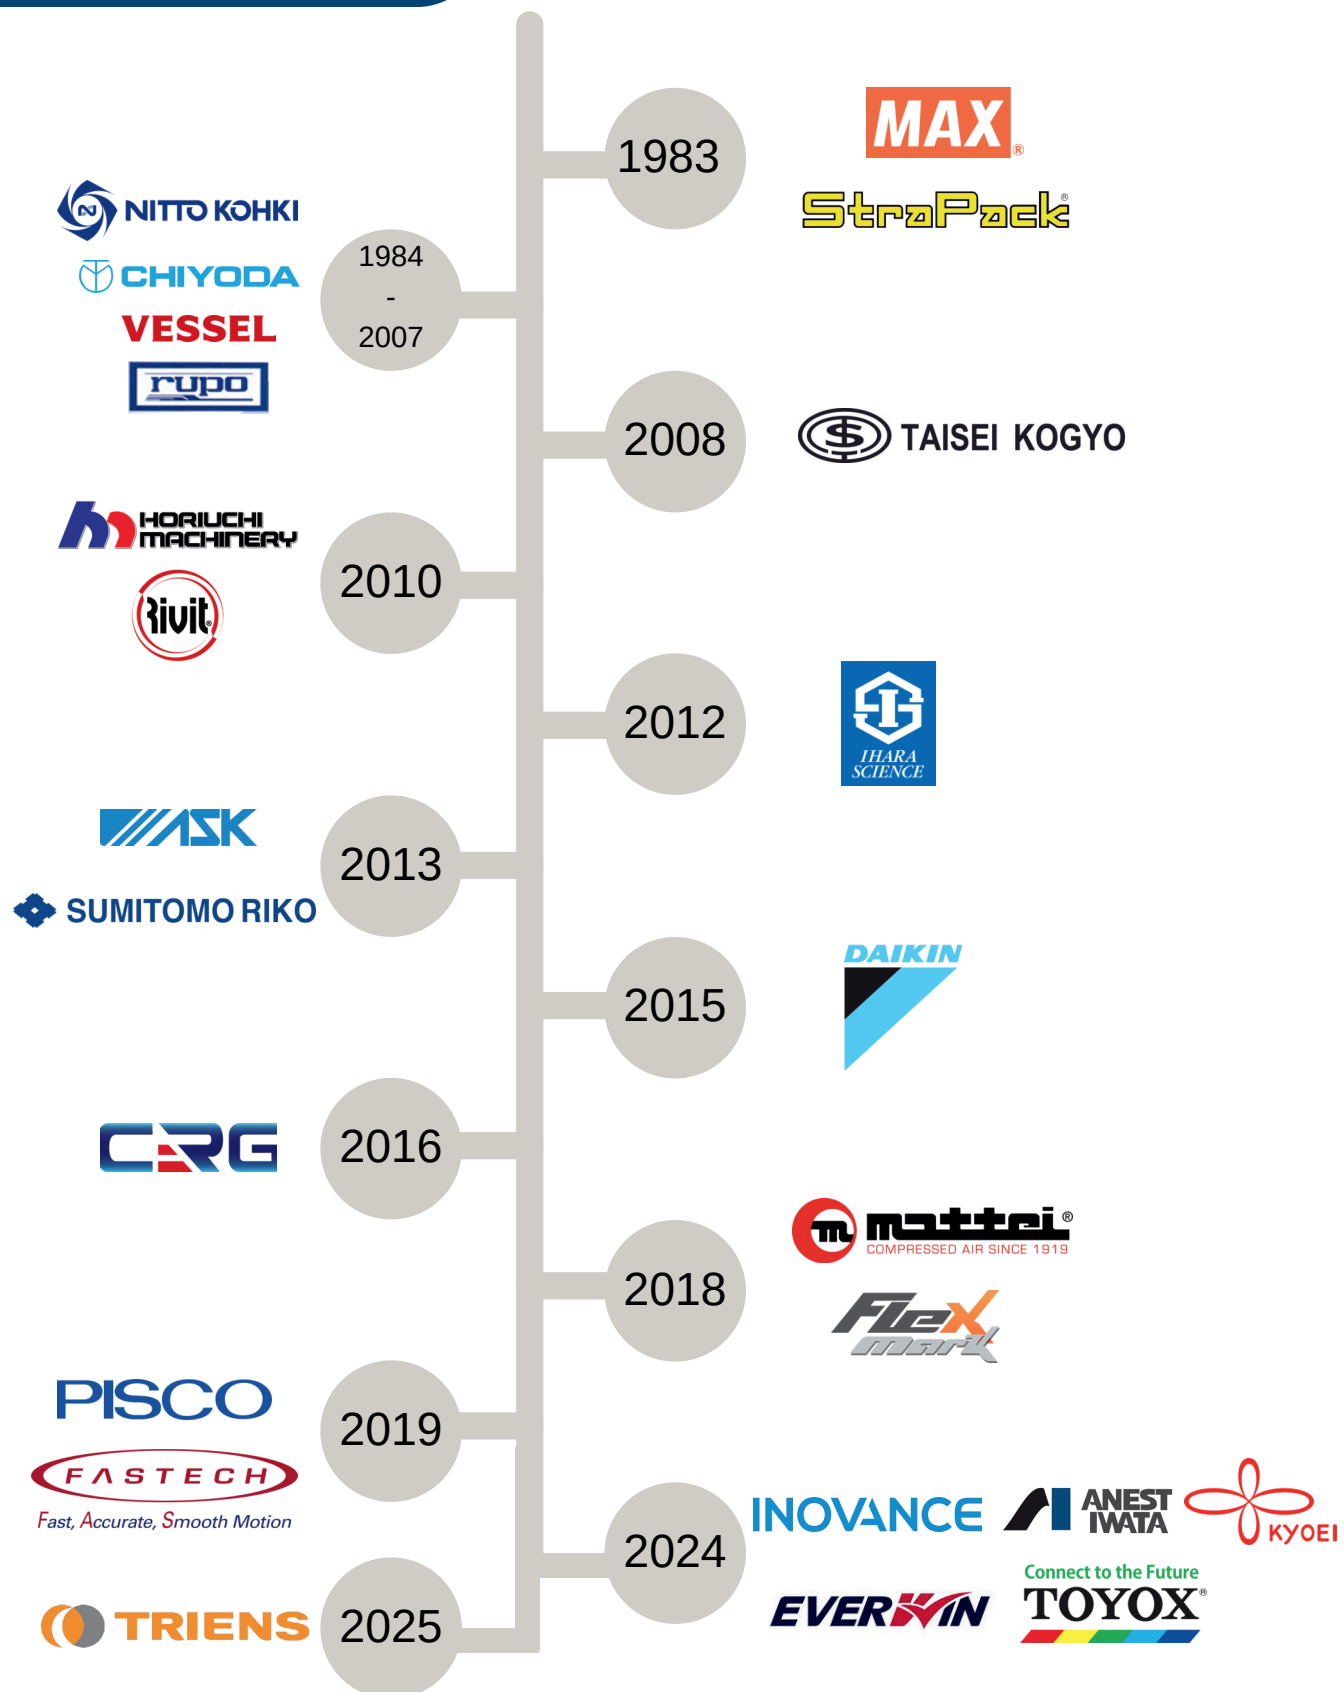

1983

Started the business by selling Max air staplers,
Strapack strapping machines, and Lihit Lab office
supplies.

เริ่มก่อตั้งธุรกิจจากการขายเครื่องยิง Max
เครื่องรัด Strapack และเครื่องใช้สำนักงาน Lihit Lab

Strapack

Fast, Accurate, Smooth Motion

INOVANCE

AIR NAILER / STAPLER

Lightweight yet heavy duty professional grade industrial tools. Best used for industrial applications such as making furniture, pallets, crating, packaging, fences, decking, sheathing, furring, and siding.

REBAR TYING TOOL

Rebar tying tools can help you finish rebar tying much more efficiently. Used widely for road and bridge, tilt up and precast factory.

DIE-CUT STICKER PRINTER

All-in-one label maker. Print custom signs on demand and in-house. Bepop is used in manufacturing, chemical plants, education and health care facilities and many more

CABLE MARKING

A portable, high speed thermal transfer printer for control panel marking, wire numbering, and device labeling.

TUBE / HOSE

High flexibility. With wide variety on both tube size and usage range as customizable capabilities fitting. Excellent oil resistance and lightweight, ideal for air piping in factories. Superior heat and cold resistance.

PNEUMATIC FITTING

Wide range of professional used pneumatic fitting. Quick connection and disconnection with full flow and vacuum resistant tank to special shaped seals. Durable and worries free.

PULSE BLOW CONTROLLER

Reduces air blow air consumption by about 50%. No power supply required. Help increase air blow effect.

PARTNERS

Pneumatics

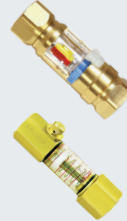

QUICK COUPLING

"CUPLA" will quickly and securely connect/disconnect various fluid lines such as air, water, oil and chemicals. Used from factories for automobiles, electric appliances, semiconductor and food to resource development sites and transportation equipment such as fuel cell vehicles.

FLOW METER / FLOW MONITOR

Visibility
Easy maintenance
Easy installation

MACHINE TOOLS

For metal working such as boring, grinding, scaling of steel materials. Used in various sites such as construction, infrastructure, manufacturing and repair of transportation equipment such as railways, ships, automobiles and aircrafts.

POWER TOOLS

Driven by compressed air, pneumatic tools are compact and lightweight. These tools possess high torque and easy control of speed and power.

AIR BLOWER

Blower supply clean air. A linear motor driven free piston pump is integrated in the resin soundproof and rainproof casing and provides a quiet and clean living environment.

VACUUM PUMP

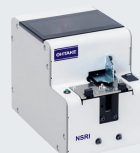

Supplied the quiet and clean pumps in the wide variety of fields such as medical, research, food, electronic manufacturing industries. The unique linear motor driven free piston pumps as well as low power consumption compact structure pumps.

ELECTRIC SCREWDRIVER

"DELVO" is for assembling electronic devices such as PCs, smartphone, printer, digital camera and automotive components. Used worldwide to tighten small screw with high precision torque control to realize production with stable quality.

AUTOMATIC SCREW FEEDER

A horizontal feeder that reduces the risk of jamming. Suited to use a wide array of screws made out of different materials and crafted into different shapes, it also supports a diverse set of functions and comes in a variety of sizes.

PARTNERS

Pneumatics

VESSEL

AIR TOOLS

Air tools that suitable for your applications including air impact wrenches as super light V-hammer, lightweight F-hammer, single, double and twin hammer, torque control and ratchet type. Air duster with several nizzle type.

BITS & SOCKETS

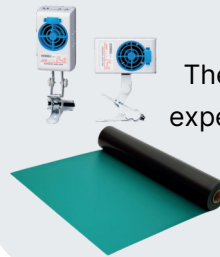

Vessel bits and sockets exemplify superior Japanese quality, featuring advanced heat treatment techniques that enhance hardness and ensure exceptional durability.

AIR NIPPER

Provided various solutions, including sliding horizontal type, double acting sliding type, thrust-cut air nipper, air-hydro heat nipper, heat air nipper, servo heat nipper with motor cylinder and many more.

STATIC SOLUTIONS

The ionizing and dust elimination expert, helps solve your problems.

HYDROPNEUMATIC TOOLS

Hydropneumatic tool with retention of the blind rivet and capture of the separated mandrel. Plastic handle and aluminium body make the tool light and handy, and consequently easy to use for operators.

DOT PEEN MARKING MACHINE

Fixed and Portable industrial dot peen marking solutions designed to meet every use. Provide dot peen and laser marking systems that increase productivity and lower total operating costs.

VANE AIR COMPRESSOR

Rotary vane compressors from the Energy Saving series ensure energy savings exceeding 15% in comparison with other rotary compressors.

OIL FREE AIR COMPRESSOR

Both air and drainage are clean. The unique composite resin piston and totally-enclosed fan-cooled motor provide a long life and clean powerful air.

PARTNERS

Packing System & Hand Tools

StrapPack®

SEMI-AUTO STRAPPING MACHINE

With dual tension mode allows for a wide variety of applications with just a flick of a switch. The iQ-400 is a durable and heavy-duty strapping machine designed to withstand various harsh environments.

PORTABLE PALLET STRAPPER

Designed to speed the placement and tensioning of strap around palletized products, the RQ-8Y/PLT can cut the time it takes to strap pallets in half when compared to hand tools.

AUTOMATIC STRAPPING MACHINE

Designed for the strapping of long objects such as pipes, lumbers or ring-shaped objects such as coils and tires. The arch rotates 90 degree and is stored inside the body after cycle completion.

AUTOMATIC STRAPPING MACHINE

The SQ-800 with brushless DC motor. The SQ-800 provides better efficiency without compromising the reliability of the legendary RQ-8x.

FROMM

STRAPPING TOOLS

PET strapping machine with an excellent mechanically features such as high breaking strength, outstanding elongation and perfect tension retaining capabilities.

EVERWIN

CARTON STAPLER

A comprehensive range of well-balanced, ergonomic staplers that provide a safe and concurrently neat closure.

TONE®

HAND TOOLS SET

High quality of hand tools from Japan.

PARTNERS

Hydraulics

ECORICH

Energy-saving hydraulic units that incorporate highly efficient IPM motors, realized low heat generation. This unit is excluded from high-efficiency motors regulations. Therefore, there is no need for replacing motors for each destination.

SUPER UNIT

Excellent power pack system for a general industrial machine. Energy-saving hydraulic units that incorporate an IPM motor and inverter. A wide range of product variations enables

FLUID COOLING UNIT

Combine hydraulic technology and our patented inverter technology to achieve high-accuracy temperature control. This feature cools the headstock and eliminates thermal deviation to improve machine function and precision. (Hydraulic oil, Water and Coolant applicant)

HYDRAULIC PUMP & VALVES

Including Pressure control valves, Flow control valves, Directional control valves, Modular stackings, Proportional & Servo valves and Multi-purpose valves. With variety of such as Piston pump, Motor pump, Rotor pump and Vane pump.

FILTRATION - OIL FILTER

The most common way to remove particles in oil is to install an oil filter. There are various of oil filters depending on fluid, installation location, max working pressure, filtration rating, and application.

FILTRATION - OIL REFRESHER

Lower running cost comparing with a general off-line filter. Cart-type filtration units enable movable filtration at several locations.

HEAT EXCHANGER

Transfers heat energy using fluid such as a liquid or gas. It adjusts temperature of hydraulic fluid or lube oil to improve working efficiency of system and prevent oil deterioration. It is an indispensable component for automobiles and industrial equipment.

FINE BUBBLE GENERATOR

HELIX NOZZLE generates Fine Bubble that diameter is smaller than 100μm.

PARTNERS

Hydraulics

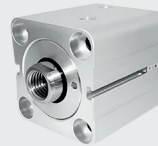

TIE ROD CYLINDER

High-quality chrome-plated construction and a soft bronze casting is used for the rod bushing to prevent scarring of the rod with high performance U-shape packing used as the rod packing. These features provide reliability and durability while protecting against oil leakage.

COMPACT CYLINDER

A unified tube and cover construction to provide a size that is approximately only a third of that of tie rod cylinders. This enables them to be installed in spaces that would be impossible for conventional cylinder, making them perfect for variable applications.

INDUSTRIAL PRESSURE HOSE

Wide-ranging products include automotive hoses, sound controlling & insulation products and interior equipment, such as engine covers and seats.

MEASURING INSTRUMENT

ASK offers pressure gauge such as Glycerin and Stainless pressure gauge, Pressure Switch, High Pressure Switch, Pressure Measurement, Flow Measurement, Level Gauge, Hydraulic Valve, Switching valve, Gauge valves.

HIGH PRESSURE FITTING

Specializing in bite tube fittings and other high-pressure fittings for hydraulic applications. Optimum piping systems customized to individual fluid applications for customers.

CARTESIAN ROBOT

A cartesian robot with compact design and 40% lower height manufactured compare to general cartesian robot.

HI-SERVO

An innovative closed-loop system that utilize a high-resolution motor mounted encoder constantly to monitor the current position.

ELECTRIC CYLINDER

An electric cylinder with stepping motor built-in as compact design and support for various communications and drive options.

AIR CYLINDER

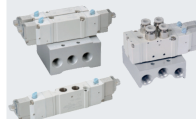

Several models of air cylinder is supplied, including standard tie rod type, ISO 15552 type, ISO 6432 type, ISO 21287 type, compact type, miniature type, pen type, round type, guide type, twin-rod type, table type, rotary actuator, clamp and swing clamp type and others.

PLARAILCHAIN

High durability with low Abrasion and wear-resistant material. Easy installation.

SOLENOID & FRL UNIT

Good cost-performance. With push-lock manual button installed, improved efficiency of maintenance. Lightweight and small-sized, yet large flow rate capacity with effective sectional area.

VACUUM EQUIPMENT

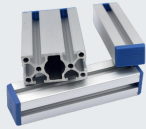

Variety type of vacuum equipment such as vacuum generator, rotary vacuum pump, external vacuum controller for vacuum pump, vacuum pad & holder (upto 24 series) and vacuum accessories suitable for most industrial applications.

VACUUM GRIPPER

Suction of various large workpieces with 3 kind of vacuum gripper, rectangular ring, whole surface sponge and aligned vacuum pads. Built-in high flow vacuum generator or external vacuum pump. Easy installation.

PROFILE & STENT MODULE

The EOAT frame connectors connect many kinds of fixing plate, brackets, connectors together to connect frame components with other grippers, nipper body and suspensions.

QUICK CHANGER

The robot automatic tool changer is a good helper in EOAT applications. The system makes the industrial robots own the capability to automatically switch EOAT tools during any application cycle. One robot can match with multi tool sides with cost effective and takes only few second to change tools.

GRIPPER MODULE

Simple and durable structure, large clamping force stable removal, wide application range light weight, strong rigidity and long life.

VACUUM MODULE

Made of silica gel and nitrile rubber, has a large tearing force, widely used in various vacuum holding equipment. Pneumatic wearing part, easy to use, and pollution-free. There is no light, heat electromagnetic generated and no damage to the workpiece.

Fast, Accurate, Smooth Motion

EZI-SERVO

An Innovative Closed Loop Stepping System that utilizes a high resolution motor mounted encoder constantly to monitor the current position.

INPUT / OUTPUT MODULE

Digital, Analog and High Speed Counter module.

EZI-MOTIONLINK

Ethernet and RS-485 network based 1-axis controller which is directly connect to various servo drives. Simple control, wiring saving and no motion board required for cost saving.

EZI-SPEED

AC Input BLDC (Brushless DC) motor speed control system. Easy speed control with front panel, switch. Compact size compared to AC geared motor.

PHOTOELECTRIC SENSOR

Detecting objects going through and arriving, detecting transparent objects, detecting marks, detecting distance, etc. 6 groups of photoelectric sensors; Built-in amplifier, Fiber sensor, Laser sensor, BGS sensor, Transparent-object detection and color mark sensor.

DISPLACEMENT SENSOR

For high accuracy measurement of not only a distance from object, but also a width, gap and edge counting. including 4 groups of product, Laser displacement sensor, Through-beam edge sensor, 2-dimensional displacement sensor and Amplifier, controller & communication unit.

VISION SENSOR

For inspection of pattern matching including shape, direction, color, shading and print inspection, inspection of shelf life of food packages by OCR.

NON-CONTACT THERMOMETER

Non-contact contributed to quick and safe measurement of object's surface temperature. Several of model such as compact thermometer, cylindrical thermometer, all-in-one thermometer, separat thermometer and hand-held thermometer.

AC INDUCTION

Standard model of small AC induction motor that can be categorized as a single-phase motor and a three-phase motor depending on the electric source.

INDUSTRIAL AC MOTOR

Compact size minimum efficiency system and reducing power consumption. High reliability and low noise. Water-proof and anti-vibration grade with IP 55.

AC GEARED INDUSTRIAL

Compact size, satisfying minimum efficiency system. High reliability and low noise. Water-proof and anti-vibration grade with IP 55.

WORM REDUCER

Lightweight and corrosion proof by applying high-quality aluminum alloy. High allowable torque. Smooth operation and low noise. High transmission efficiency. Superior design, long life use with outstanding durability and responsive to small order. Suitable for installing automated facilities.

PARTNERS

Automations & Others

INOVANCE

AC DRIVE

Wide range of functions and specifications, ease of use, and high reliability. Low voltage multidrive products for applications requiring complex multidrive systems and adopt modular design, and feature high performance, high security and a high protection rating.

PLCs & HMIs

PLCs are reliable and durable. Available in small and medium sizes, support bus applications, and can be flexibly combined. HMIs offer clear displays and an easy-to-use format. It can be integrated with any third party equipment for optimal performance.

SERVO DRIVE & MOTOR

An extensive range of specifications along with reliability, high performance, powerful functionality, easy commissioning, and a wide power range of 0.05-110 kW. Compact design, quiet running modes and high performances

INDUSTRIAL ROBOT

Products include SCARA robots; screwing robots and 6-axis robots. As well as electronic control cabinets, industrial vision products and software. Up to 220kg payload for 6-axis robot and 50kg payload for SCARA robot.

GENERAL PVC HOSE

Compatible with a wide range of fluids including water, oil, chemical and air. Highly transparent and provides security in fluid verification. Increased durability achieved by oil-resistant inner layer. Polyester thread of pressure and hard steel wire for vacuum application.

SILICONE RUBBER HOSE

Excellent heat & cold resistance and can be used under broad temperature conditions ranging from -30 to 150 degree celsius. Nontoxic, and also safe and secure due to its compliance with the Food Sanitation Act, FDA (US Food and Drug Administration) registered product, USP Class VI and corrected RoHS2 regulations.

AIR HOSE REEL

- Spring Driven air hose reel.
- Reliability and Results. Triens new redesign standard series.
- Redesigned bracket arms for added safety and support.

TEFLON FLEXIBLE HOSE

Sigma Flex has a pressure-resistant hose reinforced with a stainless-steel wire in a Teflon straight tube and a convolute hose (R) and a Triacon hose in which a Teflon tube is molded in a spiral shape. Excellent in non-stickness, heat resistance, corrosion resistance and high chemical stability.

PARTNERS

Stationery

LIHIT LAB.

DOCUMENT FILE

Keep your important documents secure and well-organized with LIHIT document Files. Ideal for professionals, students, and anyone who values organization, these files provide a reliable solution for managing paperwork.

CASE & BAG

The Everyday Functional Bag. Combining style with practicality, LIHIT's bags are designed to keep up with your busy lifestyle. With multiple compartments and pockets, it ensures all your essentials are neatly organized and easily accessible.

NOTEBOOK

The open-ring mechanism allows you to easily rearrange, add, or remove pages, ensuring your notebook adapts to your evolving needs. Crafted with high-quality paper and a durable cover, it's perfect for project planning to everyday jotting.

LIFESTYLE STATIONERY

Enhance your daily routines with our Premium Lifestyle Stationery Collection. This thoughtfully curated selection of stationery items is designed to bring both style and functionality to your workspace.

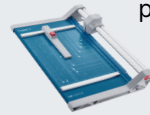

PAPER SHREDDER

High-quality shredders enable you to securely destroy your files and data carriers in accordance with ISO/IEC 21964. Our wide variety of products includes high-quality, reliable and durable document shredders with a range of security levels and innovative functionalities.

PAPER CUTTING MACHINE

Precisely cut paper for personal or professional applications we recommend our universal rotary trimmers. They cut without burrs and feature a closed cutting head for greater safety and ease of operation.

SCISSORS & SHARPENER

Titanium coating prevents adhesives from sticking to the scissor blades, protecting the stainless, hardened special steel blades and ensuring ease of use. The rubber padded soft handles make cutting even more comfortable.

FLIP CHART

Mobile flipchart easel with spring-loaded support column for infinitely variable height adjustment

MODELLING CLAY & COLORING

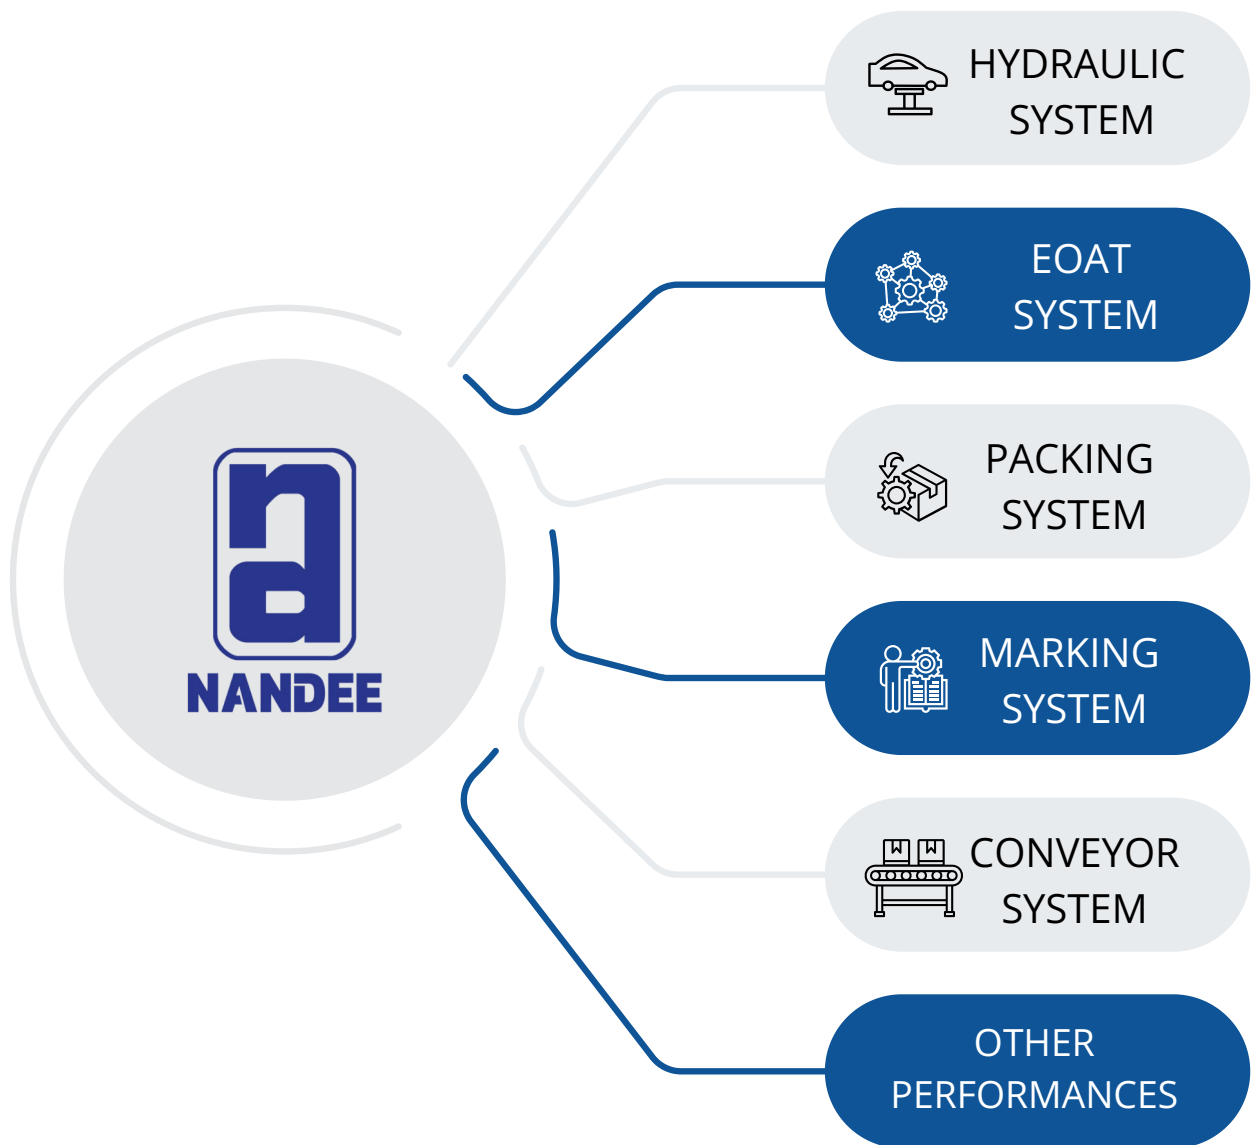

High quality of Natural Modelling Clay and variety of coloring products for young kids to professional use.

NON-TOXIC PAINT

Non-toxic educational paint from New Zealand.
