

delvo

General Catalog

delvo contributes to improvement of assembly quality.

"delvo", a screwdriver that realizes high precision torque management

Products with high reliability are born only with reliable tools.

High Precision

A high precision torque is a must to improve assembly quality. "delvo" has high repeatable torque accuracy, and it is possible to equalize the tightening torque.

Long Life

"delvo" with brush motor uses a long life motor that withstands a guaranteed fastening cycle of a million times. "delvo" with brushless motor are eco-friendly and maintenance free that realize high durability.

Shockless

Original clutch and motor stop mechanism minimizes the shock at the end of the screw fastening. It reduces the fatigue of screw fastening.

Green Procurement

Nitto Kohki has made every effort in environmental improvement schemes on a company-wide basis through the implementation of ISO14001 to execute environmentally conscious business activities. As a part of our ongoing commitment to improve the environment, we are also committed to exclude or reduce restricted chemical substances in our products, as designated by the RoHS directives and Laws and Regulations of Chemical Substances in Japan. For further details, please see the following:

Nitto Kohki group companies' Green Procurement Guidelines have been established by their environmental committee which consists of members from all the Nitto Kohki group of companies. Nitto Kohki group companies give preferential treatment to suppliers that work to an environmental policy framework. Nitto Kohki group companies periodically survey their suppliers to ensure their chemical management systems include the monitoring of environmental issues such as the RoHS directives, and Japanese laws and regulations of Chemical Substances to minimize packaging and waste. We are continuing our goal to ensure that our made-to-order items are also covered by our environmental policy.

Green Procurement Policy

Each of the Nitto Kohki group companies is clarifying the control categories of the environmental management substances included in the parts and auxiliary materials constituting Nitto Kohki products and those of the environmental management substances used in the manufacturing processes. We will promote prohibition and reduction of use of the environmental management substances according to such control categories.

Through these activities, we will comply with various laws and regulations related to the environmental management substances and reduce the impact to the global environmental conservation and to the ecological system.

Scope of Application

Our Green Procurement Guideline applies to all materials, parts, products, and auxiliary materials which Nitto Kohki Group companies purchase for production or sales.

Our Green Procurement Activities

Nitto Kohki group companies continually aim to comply with RoHS directives, and Japanese laws and regulations of Chemical Substances.

- Standard products have been RoHS compliant. Green procurement activities on made-to-order products are continuing.
- Nitto Kohki group companies are now working to the REACH Regulation.
- Nitto Kohki group companies are building a database of the chemical management substances regulated by the RoHS directives, the REACH Regulation and Japanese laws and regulations of Chemical Substances.

- Power type** — The type of power source is indicated.
- Brush motor** **Brushless motor** — The type of motor is indicated.
- Miniature screw** **Precision screw** **Machine screw** — The type of screw* is indicated.
- Screw Size** — The size range of screw is indicated.

* Miniature screw ... for 1.0 to 2.6 mm
 Precision screw ... for 1.0 to 3.5 mm
 Machine screw ... for 2.6 to 8.0 mm

About Torque Management

The fastening torque generated on the screw varies depending on the screw size, material and the type of workpiece. Always check and manage the torque generated on the screw with a torque wrench, etc. The fastening torque varies depending on the fastening conditions.

Both For both hand-held / automated machines
Auto For automated machines

Quick Reference Symbols

Current Control Type Since the torque is determined by the current value, multiple torque settings are possible.	Clutch Type The torque is determined mechanically.	LED Equipped Shows the channel in use and working status with seven color indication LED.
Lever Start Operates when the lever is pressed.	Push to Start Operates when the screwdriver is pressed.	Transformerless A dedicated controller is not required. Operates by commercial power supply.
Brushless Motor Maintenance free, no brush replacement required. Realizes high durability.	Grounded Bit Prevents the build-up of static electricity on the bit.	Low Voltage Connect to dedicated controller. Operates at electric voltage under 42 V.
Clean room adaption Adapts to assembly in class 5 clean rooms	Soft Stop Gradually reduces the rotation speed to improve the screw tightening quality.	ESD Protection Prevents electrostatic charging and saves the workpiece from electrostatic breakdown.
		Low Shock Softens the shock at the end of tightening and lowers the load to the workpiece.
		Soft Start Gradually increases the rotation speed to prevent damage to the screw head.
		Variable Speed Can be adjusted to a suitable tightening speed.

Selection Chart

This chart is for reference only.

Low Voltage (DC)
 Brush motor **Brushless motor**
 Miniature screw **Precision screw** **Machine screw**
3.0 to 8.0 mm

See page 53 for External Dimensions

Delvo Brushless Type

C Series (Current control type)

Model **DLV45C/DLV70C**

DLV45C12L/DLV45C12P/DLV70C06L/DLV70C06P

Features

- Current Controlled Torque System suitable for screw fastening work
- Low-voltage brushless motor
- ESD (Electrostatic Discharge) protection structure
- For both hand-held / automatic machines
- Controller has built in counting function. Prevents human errors
- Nine speed settings available
- Automatic three step speed control function
- Two types of measuring methods (Time/Motor rotation signal)
- Seven color indication LED (At the tip of the screwdriver)
- Two external I/O signal connection ports (NPN ⇄ PNP switchable, RS-232C)
- Various settings can be configured via a PC (Free setting software available on Nitto Kohki website)

Thirty different torque settings can be set on a single screwdriver !

Torque and fastening setting of thirty screwdrivers can be consolidated into one.

1st unit	2nd unit	3rd unit	...	30th unit
1.2 Nm 1000 min ⁻¹	1.8 Nm 500 min ⁻¹	3.0 Nm 800 min ⁻¹		3.0 Nm 400 min ⁻¹

Memorizes thirty patterns !

Torque 0.6 to 7.0 Nm range
 [5.3 to 62.0 lbf·in]

Lever Start / Push to Start

- Two types of fastening mode available subject to the workpiece and fastening conditions.
- Coordinate the actual workpieces, screws and operating conditions and determine the fastening mode, torque range and rotation speed.

Specifications

Model	Bit	Lever Start	DLV45C12L-AY	K	DLV70C06L-AY	K
		Push to Start	DLV45C12P-AY	K	DLV70C06P-AY	K
Power Source		From dedicated controller				
Torque Adjustment		From 1 to 100% in 1% increments				
Torque		(Nm [lbf·in])	0.6 to 4.5 [5.3 to 39.8]		2.0 to 7.0 [17.7 to 62.0]	
Free speed	SOFT fastening setting	(min ⁻¹)	400 to 1200		210 to 650	
	HARD fastening setting	(min ⁻¹)	100 to 700		100 to 430	
Power Consumption		(W)	44			
Screw Size	Machine Screw	(mm)	3.0 to 6.0		4.5 to 8.0	
	Tapping Screw	(mm)	2.5 to 5.0		4.0 to 6.0	
Bit Type		(mm)				
Mass		(kg [lbs])	0.63 [1.39]			
Rated Operation			ON: 0.5 seconds / OFF: 3.5 seconds			
Bit Grounding			Equipped as standard			
Standard Accessories			Bit NK35 (No.2x7x75): 1 pc. Connection Cord 2 m (DLW9078): 1 pc. Suspension Bail: 1 pc.			

Model	DCC0241X-AZ
Power Source	100 - 240 V AC, 50/60 Hz
Output Voltage	40 V DC
Input Signal Method	Photocoupler input (24 V DC drive (5 mA/1 input), NPN/PNP switchable)
Output Signal Method	Photocoupler output (30 V DC or less, 80 mA/1 output or less, NPN/PNP switchable)
Service Power Source	24 V DC (Maximum capacity 200 mA)
Serial Signal Method	RS-232C
ESD (Electrostatic Discharge) Protection	Adopted (IEC61340-5-1 compliant)
Mass	(kg [lbs]) 1.8 [3.97]
Power Cord 2 m (Optional)*	DLW9220 / DLW9240 / DLW9250

Caution

*Speed and torque differs depending on the temperature. (Use within the range of +10 to +40°C)

*Do not retighten screws that are already tightened. The torque will become larger than the set torque.

About optional accessories (See page 14)

*The power cord for the controller (DCC0241X-AZ) is sold separately. Ask us for the required power cord when ordering.

*For torque measurements, please use Nitto Kohki's Torque Checker and Soft Joint / Hard Joint (sold separately).

SOFT / HARD fastening Settings

SOFT fastening setting

Suitable for workpieces with high fastening load such as tapping screws or fastening soft objects such as rubber.

Timing chart

The image of the control action, seating the screw at the set rotation speed.

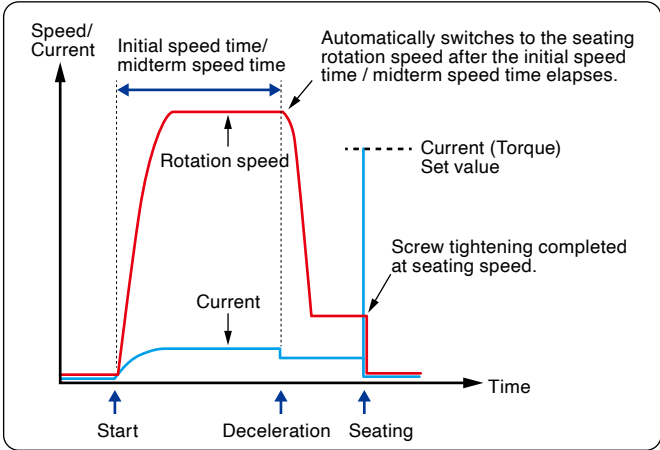

HARD fastening setting

Suitable for workpieces with small fastening load such as threaded holes or rigid bodies such as metal.

Timing chart

A control that seats the screw at the seating rotation speed according to the torque setting value, when the initial speed time / midterm speed time is elapsed.

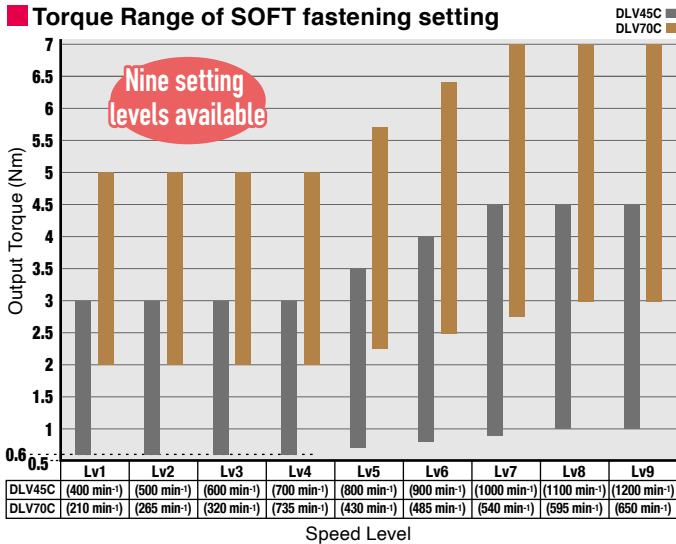

Torque range: Output Torque and Rotation Speed

There are nine levels for rotation speed setting. (DLV45C: 400 to 1200 min⁻¹ / DLV70C: 210 to 650 min⁻¹)

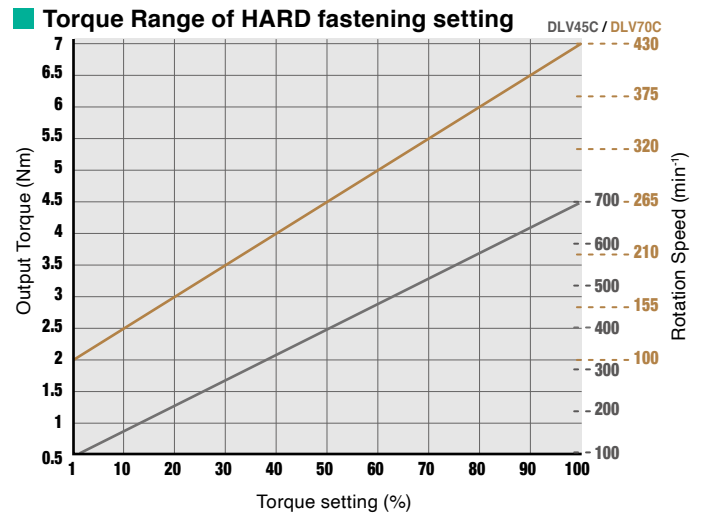

Corresponds to high torque fastening, even at SOFT fastening setting or slow rotation speed.

(DLV45C: Corresponds to a maximum of 3 Nm at 400 min⁻¹ / DLV70C: Corresponds to a maximum of 5 Nm at 210 min⁻¹)

Torque Range of SOFT fastening setting

Torque Range of HARD fastening setting

*When measuring the torque with Torque Checker, use Soft Joint (DLW4050) for SOFT fastening setting, use Hard Joint (DLW4040) for HARD fastening setting. (See page 14)

Two safety functions

1. Caution mode

A torque value that alerts the operator can be set. After the channel is switched, if the torque exceeds the preset value, a warning is displayed on the counter and the electric screwdriver will not start.

****CAUTION****
HIGH TORQUE

Flashes in yellow

2. Refastening prohibited time setting

To prevent additional fastening (second tightening, confirmation tightening, etc.), it can be set so that it does not restart after torque-up (for 0.0 to 9.9 seconds).

Adjust the set value according to the skill level of the operator and the interval between screw fastening operations.

Controller

Flashes in red

Rotation speed: Built-in automatic speed control function

Built-in automatic three step variable speed control function. Enables compatibility of "quality of slow speed" and "efficiency of high speed".

◇ Timing chart (Below rotation speeds and times are examples)

Screw fastening time measuring (Upper / Lower limit)

The upper / lower limit of screw fastening time (correct timer) can be set. It will be judged as "correct fastening" only when the measured time is between the upper limit and lower limit. Either limit can be switched off. (Below times are examples)

Two types of measuring methods

There are two methods to measure the setting time of start and midterm.

TIME
Measure by time. You can decide the setting value intuitively.

MOTOR SIGNAL
Measure by the motor rotation signal. Even if you change the rotation speed, you do not need to set the measurement time or rotation time.

Rotation direction setting

Set the direction for forward rotation. "RIGHT" for right-handed screws (clockwise), "LEFT" for left-handed screws (counterclockwise).

Channel setting

The unit of fastening work performed continuously under the same conditions is called a "channel". Up to thirty channels can be registered in the memory.

Register up to 30 channels //

◇ Example of motion setting

Channel	CH1	CH2	CH3	CH4	CH30
1: Screw fastening mode	SOFT	SOFT	HARD	SOFT	HARD
2: Number of screw fastening	2 pcs.	13 pcs.	5 pcs.	3 pcs.	20 pcs.
3: Speed level at finish	Lv5	Lv9	AUTO	Lv1	AUTO
4: Torque	10%	80%	30%	45%	20%
5: Speed level at start	Lv1	OFF	Lv9	Lv3	Lv1
6: Rotation time at start	0.1 sec.	—	0.3 sec.	0.8 sec.	1.0 sec.
7: Speed level at midterm	Lv9	OFF	OFF	Lv8	Lv7
8: Rotation time at midterm	0.5 sec.	—	—	1.2 sec.	0.5 sec.
9: Speed level at reverse rotation	Lv9	Lv9	Lv7	Lv5	Lv5
⋮	⋮	⋮	⋮	⋮	⋮
26: Rotation direction	RIGHT	RIGHT	RIGHT	LEFT	RIGHT

Channel pattern setting

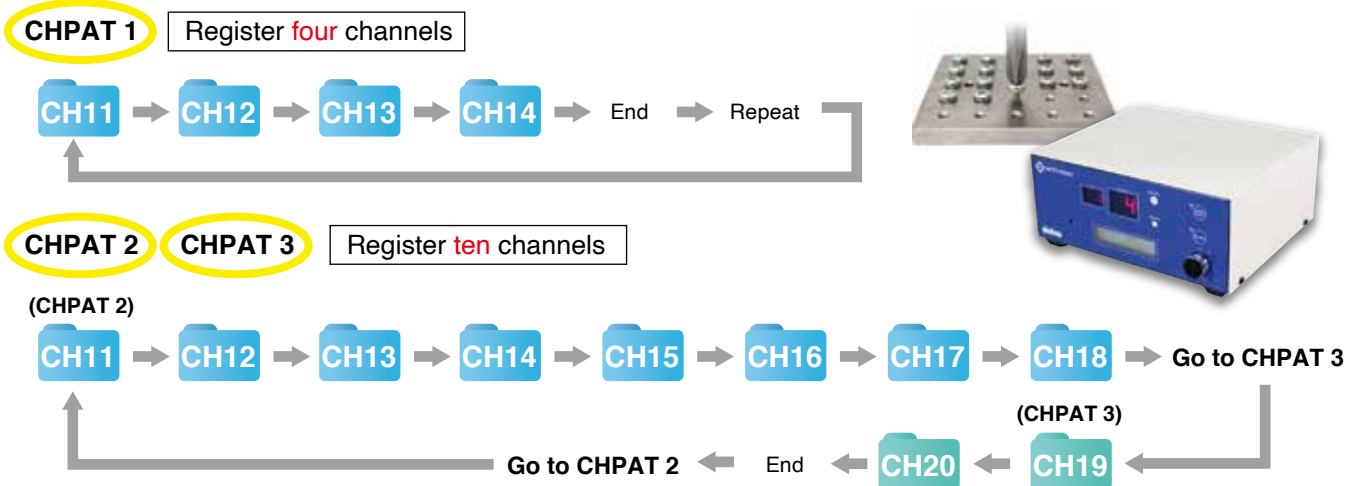

A series of operations combining each channel is called a "channel pattern". Up to eight channels can be registered per channel pattern. Up to thirty channel patterns can be set. When combining nine or more channels, use multiple channel patterns.

Combination up to eight channels //

- CHPAT 1 CH3 CH25 CH11 CH10 CH8 CH22 CH15 CH18 **8 channels**
- ⋮
- CHPAT 30 CH5 CH30 CH20 CH13 **4 channels**

◇ Example of channel pattern

Easy setting with dedicated software

Channels and Channel patterns can be easily set with dedicated software. Download free from our website.

www.nitto-kohki.co.jp/e/prd/delvo/software/

Auto reverse function

The screwdriver automatically reverses after torque-up or reaching the preset time. Auto reverse mode can be used for temporarily fastening screws or verifying tapped holes.

External I/O signal

When connecting to an external device, it can be connected in two ways.

1. External I/O Cable

Use External I/O Cable DLW9091. Compatible with both NPN/PNP. It can be wired according to the externally connected equipment.

Connector: IEEE1284 half pitch connector (26-pin)

Terminal No.	Function	Details	I/O
1	+24 V DC	Built-in service power supply (Capacity: Maximum 200 mA)	Service power supply
2	0 V DC		
3	Input signal common terminal	Input signal common terminal (See page 49 of instruction manual)	Input
4	Output signal common terminal	Output signal common terminal (See page 50 of instruction manual)	Output
5	Switching signal A	Specify channel or channel pattern using a 5-bit input signal.	Input
6	Switching signal B		
7	Switching signal C		
8	Switching signal D		
9	Switching signal E		
10	Forward rotation start	Startup with external input signal.	Input
11	Reverse rotation start	The electric screwdriver operates while the input signal is ON.	
12	Workpiece	Input workpiece signal (workpiece detection signal output). Workpiece signal is ON while input signal is ON.	Output
13	External reset	Input external reset signal	
14	Forced stop	Input the forced stop signal	
15	Channel A	The channel being operated or being set is ON	
16	Channel B		
17	Channel C		
18	Channel D		
19	Channel E		
20	Forward rotation signal	Output signal is ON during forward rotation	
21	Reverse rotation signal	Output signal is ON during reverse rotation	
22	Operation OK	Output signal is ON when the screw fastening of the set count is complete and judged as operation OK (PASS).	
23	Count up	Output signal ON for 0.3 seconds when screw fastening is normal (at torque-up).	
24	Operation NG	Output signal ON when workpiece signal is OFF during operation and judged as operation NG (FAIL).	
25	Screw fastening NG	Output signal ON for 0.3 seconds when screw fastening is NG (FAIL).	
26	N/A	No connection	—

2. RS-232C

Use Communication Cable (Straight-through) DLW9092 to connect with PCs or sequencers (PLC).

Connector pin layout (D-SUB 9-pin (female))

◆ Specifications (RS-232C)

Transmission method	Asynchronous (asynchronous communication)
Communication line	Full duplex
Transmission speed	38400 bps
Number of data	8
Parity	None
Stop bit	1
Handshake	None
Delimiter (communication separator)	Receive: CR+LF (\r\n) Send: CR+LF (\r\n)

Pin No.	Signal name	I/O
2	TxD	OUT (This tool→PC)
3	RxD	IN (PC→This tool)
5	GND	GND

*Other pins are not used

◆ Send / receive commands

Operation	Send command	Response from controller
Forward rotation drive	FWD\r\n	FWD\r\n
Reverse rotation drive	RVS\r\n	RVS\r\n
Drive stop	STP\r\n	STP\r\n
Switching channel / channel pattern *1	MOV:p\r\n (p=1 to 30)	At channel switching CH :p\r\n At channel pattern switching CHP:p\r\n
Screw count reset	CRT\r\n	CRT\r\n
Workpiece reset	WRT\r\n	WRT\r\n
Workpiece signal ON	WIN\r\n	WIN\r\n
Workpiece signal OFF	WOT\r\n	WOT\r\n
Resend request *2	RSD:p\r\n (p=1 to 10)	Command sent nth time before, specified by the parameter value
Forced stop	FSP\r\n	FSP\r\n
Canceling a forced stop	FSC\r\n	FSC\r\n

*1 The switching target differs depending on the setting of the common setting "Channel change type" (CH CHANGE). When the channel pattern is switched, the channel is also switched, so the responses are sent continuously.

*2 Up to the latest ten commands sent from the controller to the PC or sequencer are stored.

When signals could not be received correctly due to noise or some other reason, the command of nth time before, specified by the parameter will be sent from the PC or sequencer.

[Example] Send command "RSD:3\r\n" → Returns the command sent by the controller three times before.

Since control is performed even when communication between the controller and PC or sequencer fails, use this function when you wish to maintain the reliability of transmission and reception. This command transmission is not included in the ten commands that are stored.

◆ Notification command

Operation	Notification from controller
At forward rotation drive start	FWD\r\n
At reverse rotation drive start	RVS\r\n
At drive stop completion	STP\r\n
Operation OK (PASS) notification	OK\r\n
Workpiece signal ON	WIN\r\n
Workpiece signal OFF	WOT\r\n
Count up (screw fastening completes normally) notification p = Measured fastening time or signal is output	CUP:p\r\n (p=1 to 60000)
Operation NG (workpiece out while fastening count remaining) notification	WNG\r\n
Screw fastening NG (FAIL) notification p1=Screw fastening NG (FAIL) No. p2=Measured fastening time or signal is output	FNG:p1:p2\r\n
At channel switching	CH :p\r\n (p=1 to 30)
At channel pattern switching	CHP:p\r\n (p=1 to 30)
When a non-supported command or parameter is input	CER\r\n
Forced stop	FSP\r\n
Canceling a forced stop	FSC\r\n

In addition to RS-232C signals, commands are sent from the controller to the PC or sequencer (PLC) when processing is performed manually or by contact signals.

C Series (Current control type)

Model **DLV04C/DLV10C**

Features

- Easy fastening setting by controller
- Current Controlled Torque System suitable for screw fastening work
- Low-voltage brushless motor
- ESD (electrostatic discharge) protection structure
- For both hand-held / automatic machines
- Controller has built in counting function. Prevents human errors

Four screwdrivers can be consolidated into one

*The range varies depending on SOFT fastening or HARD fastening.
 *When the same bit is used.

DCC0101X-AZ

Controller can be set to any torque and speed within range.

Torque:
DLV04C 0.05 to 0.4 Nm [0.44 to 3.54 lbf · in]
DLV10C 0.2 to 1.0 Nm [1.77 to 8.85 lbf · in]
Speed: 100 to 1000 min⁻¹

All in one!

- 0.25 Nm 450 min⁻¹ 1st unit
- 0.15 Nm 600 min⁻¹ 2nd unit
- 0.35 Nm 1000 min⁻¹ 3rd unit
- 0.30 Nm 450 min⁻¹ 4th unit

Torque 0.05 to 1.0 Nm range
 [0.4 to 8.9 lbf·in]

Easily adapts for use in automatic machines

The sequencing of the screwdrivers can be controlled by a PLC.

DLP6650

For installation on automatic assembly machines, attach optional flange coupling (DLW9015) or vacuum pickup (DLP6650).

Built-in Screw Fastening Counter Function

Controller has built in counting function. Prevents human errors.

Specifications

Model	Bit	DLV04C10L-AY : K	DLV10C10L-AY : K
Starting Method		Lever start	
Power Source		From dedicated controller	
Torque Adjustment		Adjustment from 1 to 100% in 1% increments	
Torque (Nm [lbf·in])	SOFT fastening setting (1000 min ⁻¹ setting)	0.05 to 0.4 [0.4 to 3.5]	0.2 to 1.0 [1.8 to 8.9]
	SOFT fastening setting (600 min ⁻¹ setting)	0.05 to 0.35 [0.4 to 3.1]	0.2 to 0.45 [1.8 to 4.0]
	HARD fastening setting	0.05 to 0.4 [0.4 to 3.5]	0.2 to 1.0 [1.8 to 8.9]
Free Speed (min ⁻¹)	SOFT fastening setting	600 to 1000	
	HARD fastening setting	100 to 1000	
Power Consumption	(W)	30	
Screw Size (mm)	Machine screw	1.2 to 3.0	1.8 to 4.0
	Tapping screw	1.1 to 2.5	1.6 to 3.5
Bit Type		NK35 (OD6.35 mm [1/4"]) Hex. Shank)	
Mass		370 g [0.82 lbs]	
Rated Operation		ON: 0.5 seconds / OFF: 3.5 seconds	
Bit Grounding		Equipped as standard	
Standard Accessories		• Bit NK35(No.0 x 4 x 75): 1 pc. • Bit NK35(No.1 x 4 x 75): 1 pc. • Bit NK35(No.2 x 4 x 75): 1 pc. • Connection Cord 2 m (DLW9075): 1 pc. • Suspension Bail: 1 pc.	• Bit NK35(No.1 x 4 x 75): 1 pc. • Bit NK35(No.2 x 4 x 75): 1 pc. • Connection Cord 2 m (DLW9075): 1 pc. • Suspension Bail: 1 pc.

Please contact us for 4 mm bit type ("M" Bit).

Model	DCC0101X-AZ : P*1
Power Source	100 - 240 V AC, 50/60Hz
Operation Channel Function	Torque and speed setting in 4-channel memory Can switch to any operation channel
Count Function	Tracks screws fastened Workpiece detector can be incorporated
External Start up Control Function	Start up control can be enabled by external input signal
Output Voltage	24 V DC
Input Signal Method	Photocoupler input (24 V DC drive (5 mA/1 input), respond to PNP output)
Output Signal Method	Photocoupler output (30 V DC or less, 30 mA/1 output or less, PNP output method)
Service Power Source	24 V DC (Maximum capacity 200 mA)
Power Consumption	When on standby: 20 W During electric screwdriver rotation (rated): 30 W
Mass	1100 g [2.4 lbs]
ESD (Electrostatic Discharge) Protection	Adopted (IEC61340-5-1 compliant)
Power Cord 2 m (Optional)*2	DLW9220 / DLW9240 / DLW9250

*1) An NPN connection type model, DCC0101X-AZ N is also available.

*2) The power cord is sold separately.

Ask us for the required power cord when ordering. (see page 17 "Optional Accessories")

Caution

*Speed and torque differs depending on the temperature.
 (Use within the range of +10 to +40°C)

*Do not retighten screws that are already tightened. The torque will become larger than the set torque.

Comparison of Adjustment Method with Conventional Model

<p>Torque adjustment</p>	<p>Torque is adjusted by turning the adjustment ring at the end of the screwdriver.</p>		<p>Can be set with the external controller. No need to adjust the screwdriver body.</p>
<p>Conventional → C Series</p>			
<p>Speed setting</p>	<p>The speed of transformerless type screwdrivers is fixed for each series.</p>		<p>Can be set with the external controller. Adjustable between 100 to 1000 min⁻¹.</p>

SOFT / HARD Fastening Settings

Two types of fastening mode available subject to the workpiece. Coordinate the actual workpieces, screws and operating conditions and determine the fastening mode.

SOFT fastening setting

Suitable for workpieces with high fastening load such as tapping screws or fastening soft objects such as rubber.

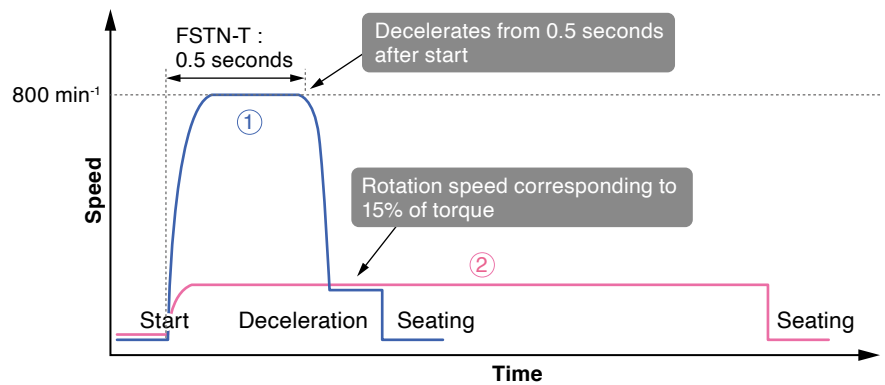

HARD fastening setting

Suitable for workpieces with small fastening load such as threaded holes or rigid bodies such as metal.

FSTN-T (Fastening Timer)

Can be set when "HARD" fastening setting is selected. By increasing the rotation speed during no-load fastening time prior to seating, the overall fastening time is reduced.

- ① Example with Fastening Timer**
 Speed: 800 min⁻¹
 Torque: 15%
 Fastening Timer: **0.5 sec**
- ② Example without Fastening Timer**
 Torque: 15%
 Fastening Timer: **0 sec**

Output Torque and Rotation Speed

*The graph is for guidance only. The output torque range is not guaranteed.

External Signals

You can input or output external signals via a signal terminal block.

Terminal No.	Function	Details	I/O
1 (+)	+24 V DC	Built-in service power source (Capacity: Maximum 200 mA)	Service power source
2 (-)	0 V DC	• Use in power source for input/output signal common wire, or for the workpiece detection sensor, etc.	
3	Channel A	In the 2-bit input signal, specify the operation channel (CH1 to CH4) • Valid only when "operation channel switching method" (No.1 CH-CHG) is set to "INPUT"	Input
4	Channel B		
5	Forward rotation startup	Startup with external input signal	
6	Reverse rotation startup		
7	WORK	Input the workpiece signal (workpiece detection sensor output) • With "count function" (No.11 COUNT-FNC) and "workpiece signal" (No.12 WORK-SNSR) set to ON, the workpiece signal input is valid	
8	WORK RESET	Reset operation (same as controller [WORK RESET] button)	
9	Keylock	Lock the controller button operation • Disable the controller button operation, and prevent setting changes by the operator	
10	Input signal negative common wire	Connect 0 V DC* • Service power source (terminal No.2) or external 0 V DC power source can be connected	Output
11	Forward rotation signal	Set output signal during forward rotation to ON	
12	Reverse rotation signal	Set output signal during reverse rotation to ON	
13	Count-up (C-UP)	Performance of normal screw tightening (torque-up) sets output signal to 0.3 seconds ON	
14	Screw fastening NG (F-NG)	If screw fastening NG, sets output signal to 0.3 seconds ON	
15	Operation channel 1 (CH1)	Set the channel output signal to ON during operation or settings	
16	Operation channel 2 (CH2)		
17	Operation channel 3 (CH3)		
18	Operation channel 4 (CH4)		
19	Operation OK	If the set count screw tightening is judged to be completed and operation OK, the output signal is set to ON	
20	Operation NG	When the WORK input signal is OFF during an operation, and the operation is judged to be NG, the output signal is ON	
21	Space	Connection impossible	
22	Output signal positive common wire	Connect +24 V DC* • Service power source (terminal No.1) or external +24 V DC can be connected	

*When PNP connection type

Optional Accessories

Grounded 3-Prong Power Cord 2 m	Screw Fastening Monitor DTM10	Vacuum Sleeve DLS4000 series	Vacuum pickup DLP6640	Vacuum pickup for automatic machine DLP6650
DLW9220 North America DLW9240 Europe DLW9250 UK	 See page 50 For traceability management! Outputs torque value from a screwdriver (converted value)	 See page 49 Select according to the screw shape	 See page 49	 See page 49 with flange coupling

 For mounting on automated screw fastening machines *The mounting screw is left-handed	 Connects controller and screwdriver	 Extends cord length between controller and screwdriver	 For mounting on automated screw fastening machines	 For mounting on automated screw fastening machines

Low Voltage (DC)
 Brush motor **Brushless motor**
 Miniature screw Precision screw Machine screw
 2.6 to 8.0 mm

See page 54 for External Dimensions

Delvo Brushless Type

S Series (Variable speed type)

Model **DLV30S/DLV45S/DLV70S**

Features

- Built-in brushless motor
- Automatic speed control function
- Built-in screw counting function
- ESD (electrostatic discharge) protection structure
- Settings can be configured with the optional Remote Controller

This screwdriver can deal with various fastening conditions.

Built-in screw counting function saves space!
 9 speed setting available.
 Wide range of specifications meet various screw fastening conditions.

Torque range **0.4 to 7.0 Nm**
 [3.5 to 62.0 lbf-in]

Lever Start / Push to Start

Built-in Automatic Speed Control Function

Low speed starting reduces the problems at start.

<Step 1>

High speed feeding at middle improves efficiency and quality of screw fastening work.

<Step 2>

Low speed fastening at finish reduces the problems at finish.

<Step 3>

Built-in the Functions of Screw Fastening Counter

- Screw count setting
- Fastening time setting, and fastening time measurement

Main LED mounted on the screwdriver

LEDs and Setting Buttons on the Screwdriver

Torque Diagrams
(for reference)

Setting with the Remote Controller

Infrared data transmission and the LCD display shorten the setting time. Simultaneous setting of multiple screwdrivers with the Remote Controller. *The Remote Controller is available as an option.

Key Lock Command

The Remote Controller can transmit the key lock command to a screwdriver. The key lock command prevents accidental button operation on the screwdriver.

*Speed and torque are for reference only. The actual values depend on the materials to be fastened and size of screws. The values are not guaranteed.

Up to eight types of motion setting or up to 8 channels can be saved in the screwdriver

Eleven functions in motion setting can be saved in each channel.

Example of motion setting

		Channel				
		C1	C2	C3	...	C8
Motion setting	1 : Number of screw fastening	2 pieces	3 pieces	1 piece		4 pieces
	2 : Speed level at start	Level 2	Level 1	Level 1		Level 2
	3 : Rotation time at start	0.20 sec.	0.30 sec.	0.30 sec.		0.20 sec.
	4 : Speed level at middle	Level 7	Level 9	Level 9		Level 9
	5 : Rotation time at middle	0.30 sec.	0.50 sec.	3.0 sec.		7.5 sec.
	6 : Speed level at finish	Level 2	Level 1	Level 1		Level 2
	7 : Min. screw fastening time	0.60 sec.	0.80 sec.	3.5 sec.		8.0 sec.
	8 : Max. screw fastening time	1.0 sec.	1.2 sec.	4.0 sec.		9.0 sec.
	9 : Auto reverse mode setting	OFF	OFF	Reverse after torque-up		Reverse after reaching the min. screw fastening time
	10 : Reverse rotation speed level	—	—	Level 2		Level 1
	11 : Reverse rotation time	—	—	0.20 sec.		0.30 sec.

Automatic Channel Switching

Channel can be switched automatically if channel switching order is preset.

*Setting with the Remote Controller is required.

Example : Channel switching is set to C3 » C1 » C2

Setting of automatic channel switching pattern

Up to four automatic channel switching patterns can be set with an external signal.

*Setting with the Remote Controller is required.

Example of setting : Installation of the workpiece detection sensors A and B connected to the external signal connector.

Automatic channel switching is set to C2 » C1 on the side of the workpiece detection sensor A.
Automatic channel switching is set to C3 » C1 » C2 on the side of the workpiece detection sensor B.

When the workpiece detection sensor A detects a workpiece, the preset automatic channel will be invoked.

When the workpiece detection sensor B detects a workpiece, the preset automatic channel will be invoked.

Built-in Auto Reverse Mode

The screwdriver automatically reverses after torque-up or reaching the preset time.
Auto reverse mode can be used for temporarily fastening screws or verifying tapped holes.

Equipped with the External Signal Connector

The screwdriver can input/output external signals through the external signal connector.

Pin No.	Lead wire color	Signal	Input / output
1	Red	+24 V DC power (supplied from outside)	
2	White	Workpiece Signal	Input
3	Green	Reset signal	Input
4	Yellow	LINK-IN	Input
		Forced stop signal	
5	Brown	OK Signal	Output
6	Blue	NG Signal	Output
7	Gray	LINK-OUT	Output
		Channel switching signal	
8	Orange	Torque-up (count) signal	Output
9	Peach	Channel A	Input
10	Purple	Channel B	Input
11	Yellow Green	Channel C	Input
12	Black	0 V DC	

Lead wire colors are the ones used in the optional signal cable ass'y DLW9090.

*Either Pin No.4 or 7 must be selected, but not both.

*Input / Output signal type is PNP.

Delvo Brushless Type

A Series (Low voltage, ESD type)

Model **DLV30A-AY/DLV45A-AY/DLV70A-AY**

Features

Eco-friendly electric screwdrivers with built-in brushless motors in a low voltage (DC) profile

- Torque range from 0.4 to 7.0 Nm
- Maximum free speeds of 650, 1200 or 2000 min⁻¹
- Both the Lever Start and Push to Start type models are available
- Equipped with a torque adjustment ring cover
- Design conforms to the RoHS Directive and thus appeals to the environmentally conscious user
- Easily detachable Pistol Grip DLW2300 ESD (TD01965) comes with the unit as a standard accessory (DLV45A/DLV70A)
- ESD (electrostatic discharge) protection structure

A Series (Low voltage, Non-ESD type)

Model **DLV30A-AS/DLV45A-AS/DLV70A-AS**

Features

- Incorporates long-life 40 V DC Brushless Motors
- Three series of screwdrivers: DLV30A-AS/DLV45A-AS/DLV70A-AS can be operated by one standard controller or counter. The dedicated controller or counter can be selected according to the application
- Wide torque range from 0.4 to 7.0 Nm
- Maximum free speeds of 650, 1200 or 2000 min⁻¹
- Robust and high durability realized by new body design using high strength plastic
- Good for left-handed operators who find built-in counter models difficult to use

Specifications

Model	DLC70S-WGB
Features	With speed control and soft start function
Power Source	100 - 240 V AC, 50/60 Hz
Output Voltage	40 V DC
Signal Output(Relay contact)	Start, Torque up, Reverse (Dry contact)
Signal Input	Drive Stop Function (24 V DC Input Voltage needed)
Mass (g [lbs])	1800 [3.97]
Size W x L x H (mm [inch])	132 x 297 x 67 [5.20" x 11.70" x 2.64"]
Bit Grounding	Ready (With a 1M Ω resistor)
Plug shape	Europe 
Standard Accessories	Power cord (2 m): 1 pc. Rubber feet: 4 pcs. Fuse (5 A): 1 pc.

Controller

for DLV30A-AS/DLV45A-AS/DLV70A-AS

Model **DLC70S-WGB** 

Features

- "Soft Start" function: The slow startup prevents screw heads from possible damage caused by the disengaged bit
- "Stepless Speed Adjustment" function widens the speed range from 390 to 2000 min⁻¹ for various applications
- The controller outputs: Start, torque-up and reverse signal via a dry contact method. These signals can be used for counting up fastened screws and preventing screw fastening errors
- "Driver Lock" function: Applying 24 V DC to the designated terminals on the controller brings the screwdriver to an immediate stop in emergency cases

Installation

See page 56 for External Dimensions

Specifications

Model	DLR70S-WGB
Power Source	100 - 240 V AC, 50/60Hz
Output Voltage	40 V DC
Speed Control Function	60 to 100%
Soft Start Function	0 to 2 sec.
Count	0 to 99
Allowable Number of Screw Fastening Programs	4
Counting Method	Count-up / Count-down
Count Correction Function	Count normal fastening only
Self Adjustable Timer Setting	0.01 to 0.99 sec.
OK Output Timer Setting	0 to 9.5 sec.
Count Back Function	ON / OFF
OK / NG Buzzer	ON / OFF
Input Signal(PNP)	WORK / RESET / LINK-IN / CH1 / CH2 / TORQUE CHECK
Output Signal(Relay contact)	OK / NG / LINK-OUT / TORQUE UP
Mass (g [lbs])	2100 [4.63]
Size W x L x H (mm [inch])	117 x 325 x 76 [4.61" x 12.80" x 2.99"]
Bit Grounding	Ready (With a 1 MΩ resistor)
Plug shape	Europe 
Standard Accessories	Power cord (2 m): 1 pc. Fuse (5 A): 1pc.

Screw Fastening Counter

for DLV30A-AS/DLV45A-AS/DLV70A-AS

Model **DLR70S-WGB** 

Features

- Equipped with "Stepless Speed Adjustment" function and "Soft Start" function
- "Count Correction" function does not count fastening errors such as elevated screws or double fastening
- "Count Back (Count Return)" function: When a screw is loosened, a reverse signal output from the electric screwdriver reverses the count by one
- Up to four different screw fastening settings can be saved in the internal memory for a wide variety of assembly work
- "Link Connection" function: Up to 10 screwdriver/controller sets can be connected in series
- Good for left-handed operators who find built-in counter models difficult to use

Transformerless (AC)
 Brush motor **Brushless motor**
 Miniature screw Precision screw **Machine screw**
2.6 to 8.0 mm

See page 56 for External Dimensions

A Series (Transformerless type)

Model **DLV30A-AB/DLV45A-AB** **DLV70A-AB**

Features

Eco-friendly electric screwdrivers with built-in brushless motors in a transformerless profile

- Torque range from 0.4 to 7.0 Nm
- Maximum free speeds of 650, 1200 or 2000 min⁻¹
- Both the Lever Start and Push to Start type models are available
- Equipped with a torque adjustment ring cover
- Design conforms to the RoHS Directive and thus appeals to the environmentally conscious user
- Easily detachable Pistol Grip DLW2300 (TD00335) comes with the unit as a standard accessory (DLV45A/DLV70A)

A Series (Transformerless, Signal output type)

Model **DLV30A-SP(AB)/DLV45A-SP(AB)** **DLV70A-SP(AB)**

- In addition to the above features of A series (Transformerless-type), SP Type (made-to-order) can output torque-up signal.

 BKE Models

DLV02/DLV12/DLV16 Series

Features

Brushless motors are incorporated for maximum tool life

- Ergonomic grip offers greater operator comfort and increased maneuverability
- Grounded bit system standard
- Clear plastic torque adjustment cover provided as standard accessory (DLV02/DLV12/DLV16SL-CKE)
- ESD (electrostatic discharge) protection structure (DLV02/DLV12/DLV16SL-BKE)
- Compliant with CE standards
- Controllers feature an overload detection function. When an overload is detected, the controller stops the screwdriver. Operation can be resumed after the screwdriver is unloaded, and the lever released (DLC16S)
- Universal input voltage from 100 to 240 V AC for easy installation (DLC16S)
- Variable speed adjustment enables you to select optimum screw tightening speed (DLC16S)

DLV7419A
DLV7419HA
DLV7429A

DLV7400A Series

Features

The light and compact body reduces operator fatigue

- Reduces shock applied to workpieces when fastening screws
- ESD (electrostatic discharge) protection structure
- Lightweight (Standard type 230 g, Clean room type 275 g)
- The Clean Room Type complies with Class 3 Clean Room Rating
- The controller can adjust speed (Screw-fastening speed can be set to suit specific fastening conditions)
- The controller provides a soft start function
- The initial speed at screwdriver startup can therefore be slowed down, effectively preventing screw heads from being scratched
- The built-in coreless motor achieves reduced inertia
- Torque accuracy is within a top-ranked worldwide level (Based on measurements at our laboratory)
- Compliant with CE standards
- Use of the Screw Fastening Counter prevents human fastening errors and enhances accurate fastening control (No CE marking applied)
- Screw Fastening Counter Model DLR5640-WN works in conjunction with any dedicated SPC-type electric screwdrivers

Delvo

DLV5700 Series Non-CE

Features

For quality improvement and productivity enhancement

- Grounded bit installation mechanism
- ESD (electrostatic discharge) protection structure
- Low-shock for tightening (30% less of standard models)
- Low swing bit mechanism
- Ergonomic design
- High-performance DC motor
- New clutch mechanism
- The rotation speed is variable according to the screw size and work environment.
- Soft start function prevents thread galling.
- By using a commercial counter or PLC with DLC0350, it is possible to control the numbers of screws tightened. (Torque-up signal output, start signal output)

DLV5800U Series

DLV5800 Series Non-CE

Features

In response to the needs of cell production system, space-saving “delvo” screwdrivers are released. Controller is designed for emphasis on space-saving size and lightness.

- Clear disengagement of clutch (low-shock mechanism unavailable)
- Grounded bit installation mechanism
- ESD (electrostatic discharge) protection structure
- New lever is adopted
- Low swing bit mechanism
- Low voltage transformerless controller

[When using DLC0350]

- The rotation speed is variable according to the screw size and work environment.
- Soft start function prevents thread galling.
- By using a commercial counter or PLC with DLC0350, it is possible to control the numbers of screws tightened. (Torque-up signal output, start signal output)

Delvo

DLV7300 Series

Features

- The dedicated controller realizes high-accuracy screw tightening
- High repeatable torque accuracy
- The controller provides a soft start function. The initial speed at screwdriver startup can therefore be slowed down, effectively preventing screw heads from being scratched
- Variable speed adjustment enables to select optimum screw tightening speed
- DLV7325, DLV7335 meet Class 5* Clean Room standards

*Based on Nitto Kohki's standard of measurement

Features

Workpiece-conscious electric screwdrivers

- Statistic electricity build-up is prevented to protect workpieces from electrostatic discharge
- Minimal impact in screw tightening protects workpieces from damaging and enables stable screw tightening
- ESD (electrostatic discharge) protection structure
- DLV7319, DLV7329, DLV7339 and DLV7349 meet Class 5* or more Clean Room standards

*Based on Nitto Kohki's standard of measurement

DLV7500 DLV8500 Series

Features

Low vibration, low noise, and easy gripping in a compact design

- The easily visible torque reach light goes on when the set torque is reached
- The combination of an advanced clutch design and the auto-stop circuit assures torque accuracy
- The long life motor with a yoke made of advanced materials further assures a long service life
- Compliant with CE standard
- ESD (electrostatic discharge) protection structure (DLV7500-BKE/DLV8500-BKE)

DLV7104 series DLV8104/DLV8204 series DLV8154

DLV7104/DLV8104 DLV8204 Series Non-CE

Features

The most popular models have been redesigned

- Equipped with bit grounding mechanism
- Long-life cam is utilized
- The clear plastic torque adjustment ring cover minimizes unintentional tampering of the preset torque
- The changeover switch enables operators to change forward/reverse rotation with a single hand
- The ergonomically designed grip can be held tightly to resist against tightening reaction force, resulting in reduced operator fatigue

Screw Fastening Counter Series

Prevents human error with various functions. * Special models available on request

The error is detected based on the set tightening time.

Self adjustable timer function

The optimum value of screw tightening time is set from the actual screw tightening.

The best time is X seconds per screw

Count Correction Function

Does not count when error is detected.

Error !

Human error prevention

Link Connection Function

Multiple screwdrivers can be linked. The other screwdrivers will be in standby state.

Count Return Function

The remaining number of screw tightening is returned when the rotation is reversed.

Reverse

Return one count

Driver Lock Function

Unnecessary screwdrivers are locked in conjunction with the workpiece sensor.

Lock when workpiece is not in place !

DLR5640-WN

- Functions of the controller and counter are integrated into a single unit.
- Equipped with Linear Start Function that gradually increases the rotation speed at start.
- Universal power input for use anywhere in the world.

Terminal block specifications

No.	Name	Definition	Remarks	I/O
1	⊕	+DC 24 V	Built-in power supply capacity 200 mA max.

Features

The self-adjustable timer function automatically assesses the time required to complete fastening each screw and reflects it on the judging time setting

- Ideally suited for the assembly lines of vehicles and electrical equipment requiring reliable screw fastening
- The controller receives signals from electric screwdrivers to provide highly reliable screw fastening control
- Functions of the controller and counter are integrated into a single unit
- Count Return Function: When a screw is loosened, a reverse signal output from the electric screwdriver reverses the count by one
- The self-adjustable timer function automatically assesses the time required to complete tightening each screw and reflects it on the judging time setting
- The Count Correction Function does not count fastening errors such as elevated screws or double fastening
- External Count Function: To be available to various assembling jobs, the DLR5640 enables counting of two kinds of parts (up to 9 counts each) in addition to the screw tightening counting. These kinds of counting can be used together.
- Link Connection Function: You can build up a simple sequential screw tightening system by connecting the DLR5640 screw tightening counters in series without using any external controller such as a programmable controller
- Driver Lock Function prevents unexpected start of screwdrivers
- Desktop or wall-hung installation is available
- Input voltage range from 100 V AC to 240 V AC is acceptable in any part of the world

Specifications

Model	DLR5640-WN
Count	1 to 99
Counting Method	Count-up / Count-down
Count Correction Function	Count normal fastening only
Self Adjustable Timer Setting	0.01 to 0.99 sec.
Work Detection Function	Yes (1 terminal) / No
External Count Input	2 terminals (PARTS A / PARTS B)
Work Installation Timer Setting	0 to 9.5 sec.
OK Output Timer Setting	0 to 9.5 sec.
NG Alarm	ON(1) / ON(2) / OFF
OK Buzzer	ON(1) / ON(2) / ON(3) / OFF
Count Return Function	ON / OFF
NG Judge Timing	WORK SET / DRIVER ON
Automatic / Manual OK Judge	AUTO / MANUAL
Screwdriver Lock Function	ON / OFF
Multiple Link	Up to 10 counters can be connected.
External Inputs on Terminal Block(NPN)	SENSOR / RESET / LINK-IN / PARTS A / PARTS B
External Outputs on Terminal Block(NPN)	OK / NG / LINK-OUT
Parameter Memory	Parameters stored in internal nonvolatile memory
Screwdriver Control	SPEED / LINEAR START
Power Source	100 - 240 V AC, 50/60 Hz
Screwdriver Power Supply	33 V DC, 1.5 A
External Dimensions (mm [inch])	W101 x D140 x H57 [W3.98" x D5.51" x H2.24"]
Mass (g [lbs])	800 [1.76]
Accessories	2 m Power cord with 3-prong USA plug Suspension bail (2 pcs.)

Example of use together with a sensor available in the market

Combinations with Electric Screwdrivers

Screwdriver Model	Connection	Remarks
DLV7410A/7410HA/7420A-SPC	The cord comes with screwdriver	Screwdriver for the screw fastening counter only
DLV7321/DLV7331-SPC	Direct connection to power source	
DLV7410A/DLV7410HA/DLV7420A/DLV7419A/DLV7419HA/DLV7429A-BMN	Optional conversion cord (TD02925 DLW9072)	General-purpose screwdriver*

* The Count Return Function is not available.

Optional Accessories

Optional conversion cord 1.5 m DLW9072	Extension Cord 2 m DLW9330	Torque Adjustment Ring Cover DLW5300	Torque Adjustment Ring Cover DLW5700
	 Extends cord length between controller and screwdriver	 This minimizes tampering or accidental turning of the torque adjustment ring once the torque is set.	 This minimizes tampering or accidental turning of the torque adjustment ring once the torque is set.

LINK Function (Common to DLR5040A & DLR5640)

When counters are connected and activated in the screw fastening sequence as shown on the right, all screwdrivers are on standby except the first one in the sequence. Only when the first screw fastening is finished, can the next screwdriver change from standby to ready. When the last fastening in the sequence is finished, the first screwdriver is once again ready and the sequence can be repeated again.

N.B. Up to 10 screwdriver/counter sets can be connected to the LINK.

See page 61 for External Dimensions

Video

DLR5040A-WE Non-CE

Features

For prevention of human fastening errors and enhanced fastening management accuracy

- Ideally suited for the assembly lines of vehicles and electrical equipment requiring reliable screw fastening
- The controller receives signals from electric screwdrivers to provide highly reliable screw fastening control
- Count Return Function: When a screw is loosened, a reverse signal output from the electric screwdriver reverses the count by one
- The Count Correction Function does not count elevated screws or double fastening
- Input voltage range from 100 to 240 V AC is acceptable in any part of the world
(The screwdrivers to be used in combination with the counter require input power supplies that are written on the respective nameplate)
- Link Connection Function: You can build up a simple sequential screw tightening system by connecting the DLR5040A-WE screw tightening counters in series without using any external controller such as a programmable controller
- Driver Lock Function prevents unexpected start of screwdrivers
- Compact and Lightweight (Compared with our conventional models decreased by 30% in volume and by 38% in mass)
- SPC type screwdrivers for DLR5040A-WE are designed on the basis of established transformerless screwdrivers

Specifications

Model	DLR5040A-WE	
Count	1 to 99	
Counting Method	Count-up / Count-down	
Count Correction Function	Count normal fastening only	
Self Adjustable Timer Setting	0.01 to 0.99 sec.	
Work Detection Function	Yes (1 terminal) / No	
External Count Input	2 terminals (PARTS A / PARTS B)	
Work Installation Timer Setting	0 to 9.5 sec.	
OK Output Timer Setting	0 to 9.5 sec.

Video

DLR5340-WE Non-CE

Features

Up to three sets of screwdrivers can be connected to one counter

- Up to eight kinds of screw fastening conditions* can be stored in internal memory for a wide variety of assembly work.
*Screw fastening conditions switchable by an external signal.
- Count-up signal outputs
- Space saving
- The Count Correction Function does not count elevated screws or double fastening as fastening errors.
- Count Return Function: When a screw is loosened, a reverse signal output from the electric screwdriver reverses the count by one.

Specifications

Model	DLR5340-WE	
Count	0 to 99	
Counting Method	Count-up / Count-down

Delvo Brushless Type

A Series (For automation)

Model **DLV30A/DLV45A/DLV70A** Non-CE

Features

For automatic assembly robots

- Three series of screwdrivers can be mounted on XY robots
- Automatic screw tightening achieves a labor-saving or unattended process
- Long-life brushless motors are incorporated in the electric screwdrivers
- The electric screwdriver generates the torque-up signal
- The screwdrivers can be connected to a sequencer to control starting, forward rotation, and reverse rotation
- An electrical noise preventive measure is employed to avoid malfunction. Each input/output signal is insulated from the screwdriver's internal circuit by a photocoupler
- Standard coupling, flange coupling, and left-hand thread coupling are available for installation

DLV45A06A-F

The Vacuum Pickup is optional.

Yellow	Power input
Blue	Bit earth
White	Input signal common (Vcc)
Black	Start signal input
Orange	Forward signal input
Gray	Reverse signal input

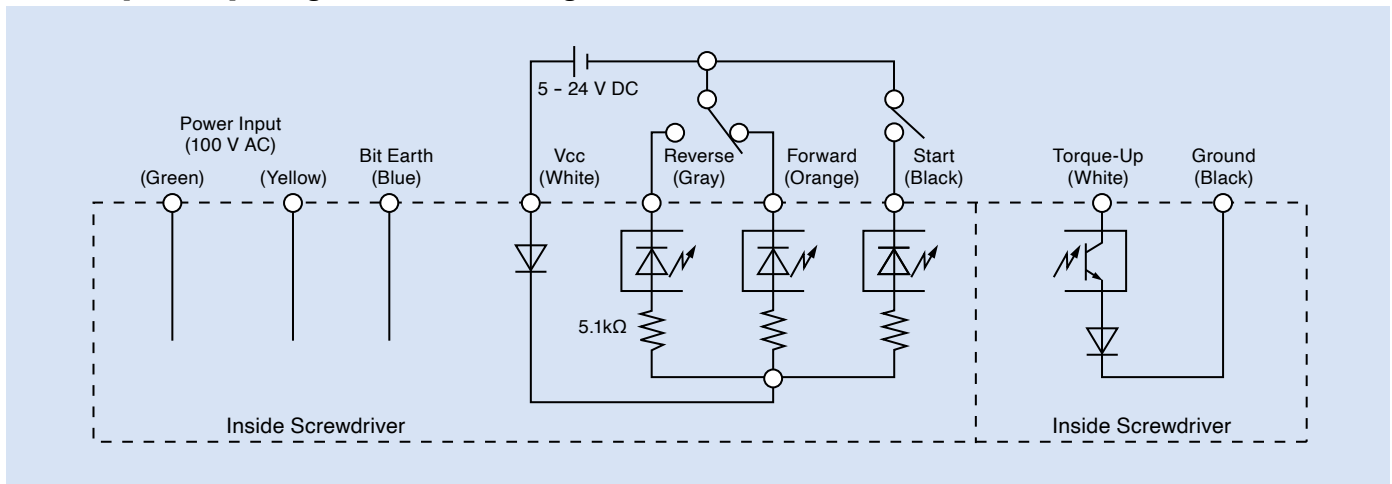

Output Signal Cable (3 m)

Color	Details
White	Torque-up signal output
Black	Ground

*Power input voltage: 100 V AC

*The I/O method is NPN.

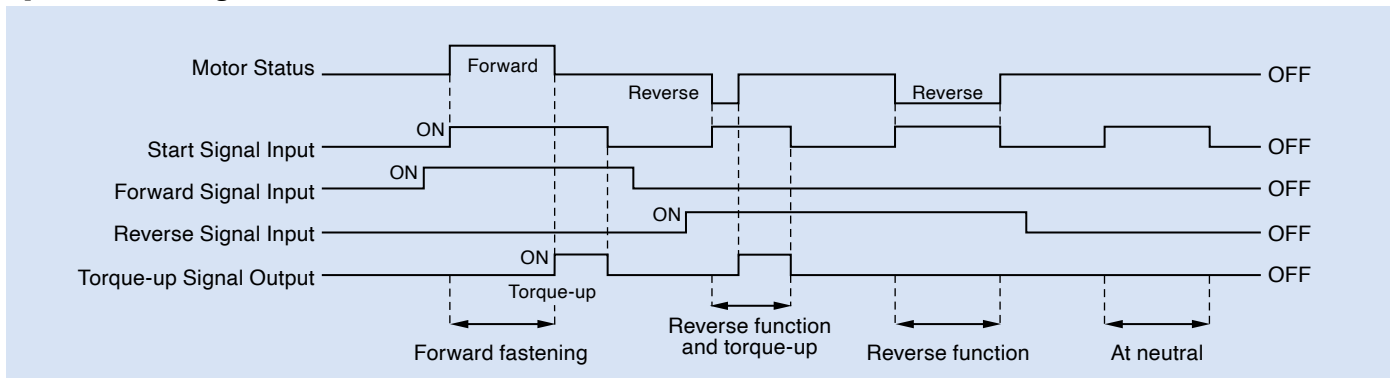

Power Input/Output Signal Schematic Diagram

⚠ Caution

- Each input/output signal is insulated from a screwdriver's internal circuit.
- Input signal rated range: Use in the range of voltage between 5 – 24 V DC (current 0.5 – 5 mA DC)
- Torque-up signal output maximum rating: Use in the range of voltage under 30 V DC and current 20 mA DC.

Operation Timing Chart

⚠ Caution

- Input the start signal after inputting the forward/reverse signal.
- Do not input the forward signal and reverse signal at the same time.
- After confirming that the wiring is correct, turn the power ON.
- When energizing the power cable or signal lines with incorrect wiring, failure of the device could result.
- Use an I/O signal within the rating.
- Using voltage or current that exceeds the rated value could cause device failure.
- Do not directly connect a relay or lamp to the signal output to control.
- The effects of surges, etc. generated from an induced load could cause device failure.
- Make sure that screwdriver rotation is completely stopped and then switch between forward and reverse rotation.
- If the rotation direction is switched while the screwdriver is rotating, the motor suddenly stops.
- Do not forcefully bend or pull the signal line.
- Doing so could cause a broken signal line or detachment from the screwdriver, causing device failure.
- To avoid excess load in the axis direction, use a level switch to properly set the height.
- The recommended pressing force is 1 kg or less.

Model **DLT1173A/DLT1673A/DLT1973A Series**

Accessories

Features

Maintaining high assembly quality with ease

- Measured data is stored even after the power is turned off, preventing any data loss
- Energy saving type with AUTO POWER OFF function (Power is automatically turned off when left unused for 10 minutes)
- A program designed for uploading the data stored in the "delvo" torque checkers to a computer is available to download free from the Nitto Kohki website www.nitto-kohki.co.jp/e/prd/delvo/software/
Use a cable (USB Type-B) available on the market to connect to a PC.

Specifications

Model	DLT1173A	DLT1673A	DLT1973A
Measurement Range (Nm[lbf·in])	0.015 to 1.500 [0.13 to 13.3]	0.15 to 10.00 [1.33 to 88.5]	4.00 to 12.00 [35.4 to 106.2]
Calibration Precision	Within ± 0.5% (Full Scale)	Within ± 0.5% (Full Scale)	Within ± 0.5% (Full Scale)
Display	4-digit digital display (Single-line) Data sampling: 1000 times/sec. Display rate: 12 times/sec.		
Measuring Unit	kgf · cm, Nm, lbf · in (selectable)		
Data Memory	800 pieces of data		
Measuring Direction	CW and CCW		
Measuring Mode	3 modes: PD-TR-PP		
Auto Power Off	Power off if left untouched for 10 minutes		
External Output	As per USB output Mitsutoyo Digimatic		
Analog Output	Approx. 1.5 V max.	Approx. 1.0 V max.	Approx. 1.1 V max.
	No zero offset; identical waveforms produced in PP, PD, and TR modes		
Continuous Operation Time	20 hours		
External Dimensions (mm)	W160 × D110 × H47 [W6.3" × D4.33" × H1.85"]		W200 × D112 × H48.5 [W7.9" × D4.41" × H1.89"]
Mass (g [lbs])	1100 [2.43]		1400 [3.09]
Rechargeable Battery	Nickel metal hydride battery		
Charger Type	DLE1833A		
Input Voltage for Charger	100 - 240 V AC, 50/60 Hz		
Charging Time	4 hours		
Standard Accessories	• Screw Joint (DLW4430)	• Bit Joint (DLW4360) • Spring for Joint (DLW4660)	• Soft Joint (DLW4000) • Bit NK35 (13 x 19 x 10 x 75)

Joint

*1 Made-to-order

*2 Select the correct size number that fits your screw head.

[Sleeve selection guideline]
Select a sleeve whose ød is 0.1 to 0.3 mm larger than the diameter of the screw head.
(Please note that this does not apply to some screws.)

See page 64 for External Dimensions

Accessories for "delvo" Brushless Type C Series

Screw Fastening Monitor

Model **DTM10/DTM45**

Features

For traceability management!
Outputs torque value from a screwdriver (converted value)

- Converts motor current to torque value at torque-up
- Sends data to external devices such as computers and PLCs
- The free dedicated software is available on Nitto Kohki website
- OK(Pass)/NG(Fail) can be judged by the output torque (converted value) and screw fastening time

Accessories

Torque Reaction Arm

Model **DRA-SW-650/DRA-SL-650**
DRA-TS-1000

Features

For reducing reaction force to an operator and improving quality of screw fastening work!

- Improves operation by reducing reaction force
- Vertical tightening to the workpiece improves quality of the work*
- Low profile type for convenient installation*

*except DRA-TS-1000

Specifications

Model		DRA-SW-650 (Swing type)	DRA-SL-650 (Slide type)
Total height	mm[in]	550 [21.65"]	
Mass	kg[lbs]	4.2 [9.26]	
Maximum operating radius*1	mm[in]	R650 [R25.59"] (When arm angle is 30°)	R400 to R650 [R15.75" to R25.59"]
Vertical stroke*2	mm[in]	100 [3.94"] (150 [5.91"])*3	
Amount of slide	mm[in]	—	250 [9.84"]
Applicable outer diameter of screwdriver	mm[in]	30 to 52 dia. [1.18" to 2.05"]	
Maximum screwdriver weight	kg[lbs]	1.0 [2.2]	
Applicable models		All models of "delvo"	

Model		DRA-TS-1000 (Telescope type)*4
Operation range (Arm length)	mm[in]	503 to 1000 [19.8" to 39.4"] (503 to 1123 [19.8" to 44.2"])
Mass	kg[lbs]	0.47 [1.04]
Applicable outer diameter of screwdriver	mm[in]	30 to 52 dia. [1.18" to 2.05"]
Applicable models		All models of "delvo"

*1 When an electric screwdriver of 52 mm dia. is attached *2 When DLV70A is attached
 *3 When the stroke extension ASSY is used *4 Use a tool balancer to hang the screwdriver.

Optional Accessories

[Stroke extension ASSY]

Model: **DRW1000**
 Part Number: TD09755

Parts included:
 ① Push spring
 ② Spring guide B

*Before extension

Vacuum Pump DLP2500 series

Accessories

Electric Screwdrivers can be used with Vacuum Pump and Vacuum Pickup. The sleeve of Vacuum Pickup sucks the screw and holds it on the bit, enabling the operator to pick it up with the tool itself, thus improving operational efficiency and operator's productivity.

Model	DLP2530	DLP2570
Features	Standard	With CE mark
Power Source	100 V AC, 50/60 Hz	230 V AC, 50/60 Hz
Power Consumption (W)	30(50 Hz), 26(60 Hz)	
Achievable Vacuum (kPa)	-21.3	
Flow Rate (at Outlet) (L/min)	24(50 Hz), 26(60 Hz)	
Screw Size(reference) (mm)	4 or less	
Mass (g [lbs])	3800 [8.38]	

Torque Adjustment Ring Cover

Accessories

DLW5201

Fits over torque adjustment ring cover to minimize tampering or accidental turning once the torque is set.

Model	Part No.	Applicable Screwdriver	Material
DLW5201	TD05639	DLV30A (Transformerless type)	Plastic
DLW5202	TD08486	DLV45S, DLV70S and DLV45A, DLV70A	Aluminum
DLW5203	TD09222	DLV30S and DLV30A (Low voltage type)	Plastic (ESD)
DLW5300	TD00332	DLV7301, DLV7000, DLV8000 series (for 4 mm bit)	Aluminum
DLW5400	TD01883	DLV7301 series (for 6.35 mm bit)	Aluminum
DLW5500	TD00333	DLV7303 series (for 4 mm & 6.35 mm bit)	Aluminum
DLW5600	TD00334	DLV7500, DLV8500 series	Plastic
DLW5700	TD02875	DLV5700, DLV5800, DLV7400A series	Aluminum
—	TV07315	DLV02SL-BKE, DLV12SL-BKE, DLV16SL-BKE series	Plastic (ESD)
—	TV06787	DLV02SL-CKE, DLV12SL-CKE, DLV16SL-CKE series	Plastic

* As this is a clear plastic cover, torque scale can be seen even after mounted on the screwdriver.

Tool Balancer

Accessories

TW-06R
TW-1R

RW-3
RW-5

Easy to adjust tension by using handle.

Model	TW-06R	TW-1R	RW-3	RW-5
Capacity (g [lbs])	200 to 600 [0.44 to 1.32]	500 to 1500 [1.1 to 3.31]	1000 to 3000 [2.2 to 6.61]	2500 to 5000 [5.51 to 11.02]
Stroke (m [inch])	1.5 [59"]		2 [78.7"]	
Mass (g [lbs])	300 [0.66]		700 [1.54]	900 [1.98]

Pistol Grip DLW2300/DLW2300ESD

Accessories

Easy-to-attach grip suitable for horizontal operation.

Model	Applicable Screwdriver
DLW2300 (Non-ESD)	DLV7104/DLV8104/DLV8204 DLV7500-MKE/DLV8500-MKE DLV30A/DLV45A/DLV70A(Transformerless type) DLV30A/DLV45A/DLV70A(Low voltage, Non-ESD type)
DLW2300ESD	DLV7500-BKE/DLV8500-BKE DLV45C/DLV30S/DLV45S/DLV70S DLV30A/DLV45A/DLV70A (Low voltage, ESD type)

Shaker Box Made of Anti-electrostatic Resin

Accessories

DLW3403

DLW3603

DLW3803

The screws will fall into the heads-up position for easier vacuum or magnetic pickup. The anti-electrostatic resin greatly reduces static build-up and dust attached to the shaker box.

Model	DLW3403	DLW3603	DLW3803
Part No.	TD10096	TD10097	TD10098
Hole Pitch (mm [inch])	6 [0.24"]		8 [0.31"]
Hole Depth (mm [inch])	13.5 [0.53"]		12.5 [0.49"]
No. of Holes	273	273	160
Screw Size (mm)	1.7 to 2	2 to 2.6	3 to 4
External Dimensions	W142 x H25 x D94 (W5.60" x H0.98" x D3.70")		

Torque Reaction Arm

Accessories

Usage Example

For enhanced productivity and prevention of operator's repetitive motion injury, a torque reaction arm should be used all together.

Part No.	Description	Applicable Screwdriver
TD06180	Torque Reaction Arm	A series(DLV30A/DLV45A/DLV70A) S series(DLV30S/DLV45S/DLV70S)

Optional Cord

Accessories

Curl Cord

Cord Connector

Please inquire of the distributor for the price and minimum quantity on each optional cord.

Part No.	Optional Cord	Applied Models	Length (m)
TD02826	5P to 6P Exchange Cord*		0.1
TD02548	Extension Cord For 5P DLW9320	DLV7300 series	3.0
TD10049	Extension Cord For 6P DLW9330		2.0
TD01882	Curl Cord		0.4
TD02820	Curl Cord	DLV7500 DLV8500 series	1.0
TD02438	Cord Connector DLW9100		

* "5P to 6P Exchange Cord" is used to connect "5-prong Screwdriver" to "6-prong Controller".

Angle Attachment

Accessories

For tightening work at right angles.
(for use with lever start type only)

Specifications

Model	DLW9020	DLW9021
Applicable models	Made to order models (Lever start type, Bit type: OD 5 mm Hex. Shank)	DLCV45C/DLV7104/DLV7204 Series DLV30S(Lever start type) ^{*1} DLV30A(Lever start type) ^{*1}
Operable torque range	2.0 or less ^{*2}	
Gear ratio	1:1	
Dimension of A (Nm)	Approx. 44.8 (When using 70 mm bit)	Approx. 56 (When using 75 mm bit)
Bit Type (mm)	<p>OD 5 mm Hex. Shank</p>	<p>OD 6.35 mm Hex. Shank</p>

*1: Use with a torque scale of 2 or more.

*2: Using beyond the operable torque range may cause a malfunction.

SAFETY GUIDE

Be sure to read and understand the following safety notations and all safety precautions.

 **WARNING:** Indicates a potentially hazardous situation which, if failure to comply with the instructions given, could result in serious injury or death.

 **CAUTION:** Indicates a potentially hazardous situation which, if failure to comply with the instructions given, could result in injury or material damage.

Safety Precautions

- Be sure to follow the safety precautions to keep accidents such as fires, electroshock, and injuries from occurring.
- Before using your tool, please read this manual carefully so that you may use it properly to get the most out of it.
- Keep the manual handy – so you can use it whenever necessary.

WARNING

- Keep work area clean. Cluttered work areas and benches invite accidents and injuries.
- Consider proper working environments for each tool carefully. Do not expose electric tools to extreme amounts of moisture or direct contact with water or rain. Keep area well lit at all times to prevent hidden dangers and never operate the equipment near flammable liquids or in gaseous or explosive atmospheres.
- Prevent operators from electric shock. When using electric tools, prevent body contact with grounded surfaces (e.g. pipes and outer frames of radiators, microwave ovens, and refrigerators, etc.).
- Keep all electric tools and power cords away from children and all unauthorized personnel. Also all visitors should be kept away from work area.
- Properly store tools and accessories while not in use. They should be kept in a dry, locked-up location out of reach of children or unauthorized personnel.
- Do not force tool. It will do the job better and more safely at the rate for which it was intended.
- Use the right electric power tool that can complete the job within its specifications. Do not attempt to adapt improper attachments or accessories to complete a job. Do not use the tool for other than what they were designed for.
- Dress properly. Do not wear loose clothing and/or accessories. (gloves, necklace etc.) They can be caught in moving parts. Non-skid footwear is recommended in outdoor operation. Wear protecting hair covering to contain long hair.
- Always wear safety glasses during operation. Wear respiratory protection when working in an environment where dust particles are generated during operation.
- Do not abuse cord. Never carry tool by cord or yank it to disconnect from receptacle. Keep cord from heat, oil, and sharp edges.
- Use clamps or a vise to secure the work piece tightly and eliminate vibration. Never hold the work piece with your hands, keep both hands on the electric tool for increased productivity.
- Do not overreach. Keep proper footing and balance at all times.
- Maintain tools with care. For safe and efficient work, use the proper bit and check it regularly. Do not use the bit with a worn out or deformed tip. When oiling and replacing parts, follow the instructions given by the instruction manual. Inspect tool cords periodically and if damaged, have them replaced by an authorized service facility. Keep handles dry, clean, and free from oil and grease.
- Disconnect a tool or a controller when not in use, when repairing, or when changing accessories and bits, etc.
- Remove adjusting keys and wrenches. Form habit of checking to see that keys and adjusting wrenches are removed from tools before turning it on.
- Always avoid an unexpected start by having all power switches in the off position prior to attaching to a power supply. Never carry tools with your finger on the on/off switch when the power is attached. Never plug the cord into a receptacle while your finger is on the on/off switch.
- When the tool is used outdoors, use an electric extension cord or cable suitable for outdoor use.
- Stay alert. Watch what you are doing. When using electric tools, take good care of tool handling, working manner, and surrounding conditions. Use common sense. Do not operate tool when you are tired.
- Check damaged parts. Before further use of the tool, an accessory or other part that is damaged should be carefully checked to determine that it will operate properly and perform its intended functions. Check for alignment of moving parts, binding of moving parts, breakage of parts, mounting, and any other conditions that may affect its operation. When repairing or replacing parts, follow the directions of the instruction manual. The part that is damaged should be properly repaired or replaced by an authorized service facility unless otherwise indicated elsewhere in this operation manual. Have defective switches replaced by an authorized service facility. Do not use the tool if the switch cannot be turned on and off.
- Use only recommended accessories and attachments as per tool operator manual and “delvo” general catalog. Use of improper accessories and attachments may result in an accident or serious injury.
- Any repairs on the tool should be performed only by an authorized service facility. Do not modify the tool that is complying with the safety standard. If the repairman who has poor knowledge and skill repairs the tool, the tool may not give a good performance and result in an increased risk of injury to the user.
- The power source must be limited to the individual tools specifications as stated on the nameplate or instruction manual. If used at a higher or lower voltage than indicated, it may cause failure and result in an increased risk of injury to the user.
- Before work operation carefully check if there are underground installations such as conduit, water pipe, and gas pipe, etc. If a tool should touch them, it might cause electric shock, electric leak, or gas leak.
- Hold the tool body firmly so as not to be swung by it when using. If not, this may cause injury.
- Do not bring hand or face close to moving parts such as bit etc. when using. This may cause injury.
- When you have dropped the tool by mistake, carefully check the tool if there is breakage, cracks or deformation. This may cause injury.

CAUTION

- Install bits or accessories securely in accordance with the operation manual. Insufficient installation may cause injury.
- Whenever setting the torque, unplug the cable of the tools. Adjusting the torque setting during rotation may cause injury.
- When operating a tool at high places, check that there is no person under the places. Do not stumble over the cord nor drop the material or tool body. This may cause injury.
- Never leave a tool running unattended on the working bench or floor. Always turn the power switch or lever to the off position and disconnect from the power source when not in use.
- Do not overload to the extent that the motor locks or the clutch malfunctions. This may cause smoke, fire, failure or injury.
- If the tool is overheating or functioning abnormally, stop using the screwdriver immediately and inspect it to see whether any repairs are necessary. Otherwise this may cause failure or injury.
- The electric screwdriver may overheat depending on the type of screw, type of screw-tightened material, or frequency of use. To avoid overheating, stop operating the screwdriver for a time or use several drivers in alteration. Overheating may reduce the life of the product or cause failure or injury.
- The fastening torque may vary depending on how the product is operated or held, the type of screw, and the fastening conditions. Use a torque wrench or similar tool to check that the fastening torque is appropriate.

How to select a suitable model

A suitable model can be selected in 5 steps.

1

Check the torque and screw size

Case A

- Fastening M4 screws with a fastening torque of 1.0 Nm.
- The material of the workpiece is stainless steel.

Case B

- Fastening M3 screws with a fastening torque of 0.5 Nm.
- The material of the workpiece is plastic.

CHECK!

Torque Adjustment		Stepless	
Torque	(Nm [lbf-in])	0.03 to 0.2 [0.3 to 1.8]	0.15 to 1.2 [1.3 to 10.6]
Free Speed	(min ⁻¹)	700 - 1000	
Power Consumption		(W) 48	
Screw Size	Machine Screw	1.0 to 2.2	1.4 to 3.0
	Tapping Screw	1.0 to 2.0	1.4 to 2.6
Mass	(g [lbs])	470 (1.04)	

Check the torque and screw size in the specification chart.

*Please refer to the List of Screwdrivers on page 3 to 7.

2

Select the starting method

• A push start model is required as the production tact is fast.

• A lever start model is required as the workers are not skilled.

CHECK!

Starting Method	Lever Start	Push Start
Power Source	20 to 30 V DC	20 to 30 V DC
Torque Adjustment	Stepless	Stepless

Check the starting method in the specification chart.

3

Select the free speed

• A high speed model is required to enhance working efficiency.

• A low speed model is required to fasten tapping screws.

CHECK!

Torque	(Nm [lbf-in])	0.15 - 1.2 [1.3 - 10.6]
Free Speed	(min ⁻¹)	700 to 1000
Power Consumption		(W) 48
Screw Size	Machine Screw	1.4 to 3.0

Check the free speed in the specification chart.

4

Select the voltage and features

• A low voltage model is required for safety.
• Function for reducing the rotation speed at the beginning and end of fastening is required to prevent screw fastening failures.

• Variable speed function is preferred.
• Built-in screw fastening counter function is required.

CHECK!

Lever Start	Low Voltage	Grounded Bit	ESD Protection	Low Shock	Variable Speed	Soft Start

Check the features with the pictograms.

*Please see page 2 for the detailed information of the symbols.

5

Select the model

DLV30S20P-AYK and dedicated controller DEA0241N-AZ

DLV10C10L-AYK and dedicated controller DCC0101X-AZ

*The above selected models are only examples.
